- 6) Overall Length: 9-1/2"
- 7) Additional Features: Secure-Ex™ Sheath
- 8) Knife Type: Fixed
- 9) Steel Family: AUS
- 10) Blade Shape: Spear Point
- 11) Product Family: Counter Tac

COUNTER TAC™

It's been observed that fashion is fleeting. What's "in" now will soon be "out" of style. The knife industry, like any other, is subject to the same winds of political correctness and notions of popular taste. At Cold Steel, we try to stay abreast of the currents of change, but we also recognize that good design never goes out of style. The Cold Steel Tantos, Trail Master, and Voyagers illustrate this point very well.

Our new Counter TAC™ boot knives were designed with this simple philosophy in mind. The full tang blades are made from beautifully polished AUS 8A Stainless steel that's vacuum heat treated, and sub zero quenched for strength. They are hollow ground and end in a sturdy, but needle sharp point that's ideal for effortless penetration, and of course the edge is razor sharp.

The ergonomic design of the Kraton® grip is comfortable and adaptable to any fighting style, and the deeply textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances.

Finally, each Counter TAC™ is shipped with a state of the art Secure-Ex® sheath, so you can carry or conceal it just about anywhere.

COUNTER TAC™
NEW VG-1 STAINLESS BLADES

Our Counter TAC boot knives were designed with one simple philosophy in mind. Functionality.

Quite simply - they work, and they excel at what they do!

The Counter TAC's full tang blades are made from beautifully polished and ground VG-1 Stainless steel that's vacuum heat treated, and sub-zero quenched for strength and durability.

Designed to cut as well as thrust, their double edged blades are perfectly hollow ground with a unique cross section that allows for a surprisingly effective cut, while still keeping the double edges and needle tip stiff enough to put in good work without damage.

The ergonomic design of the Kray-Ex handle is comfortable and adaptable to any grip, and the deeply textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances.

Finally, each Counter TAC is shipped with a state of the art Secure-Ex® sheath, complete with a removable boot/belt clip and lashing slots so you can carry or conceal it just about anywhere.

1.2) Counter Point XL, 6", AUS 10A

We spent years exploring high-end boot knives, and now we've applied that knowledge to a folding knife the Cold Steel Counter Point.

The Counter Point is available in three blade sizes - 3", 4" and 6". Their stiletto-inspired spear point blades have a distinctively pronounced false edge and a lustrous satin finish, combining to make a blade that not only looks great, but delivers a show stopping performance!

Made from Japanese AUS10A Steel, the Counter Point is highly corrosion and stain resistant and takes a very sharp and durable edge.

The Counter Points handle is made from Griv-Ex and reinforced with heat treated aluminum liners, making it not only very strong, but comfortable and secure in almost any grip imaginable.

For added strength and safety, we equipped the Counter Point with our famous Tri-Ad locking mechanism, proven again and again to be incredibly strong and shock resistant.

Technical Specifications

- 1) Weight: 7.9 oz.
- 2) Blade Thickness: 4mm
- 3) Blade Length: 6in
- 4) Handle Length/Material: 7-1/8" Long Griv-Ex™
- 5) Steel: Japanese AUS10A
- 6) Overall Length: 13 1/8"

COUNTER POINT SERIES

We spent years exploring high-end bootknives, and now we've applied that knowledge to a folding knife - the Cold Steel® Counter Point. The Counter Point is available in three blade sizes - 3", 4" and 6". Their stile-to-inspired spear point blades have a distinctively pronounced false edge and a lustrous satin finish combining to make a blade that not only looks great, but delivers a show stopping performance!

The Counter Point is highly corrosion and stain resistant and takes a very sharp and durable edge. The Counter Point's handle is made from Gri-Ex™ and reinforced with heat treated aluminum liners, making it not only very strong, but room for table and secure in almost any grip imaginable. For added strength and safety, we equipped the Counter Point with our famous Tri-Ad® locking mechanism, proven again and again to be incredibly strong and shock resistant.

GUNSITE®

The Gunsite® is a specialized version of our Counter Point 1. It has a half serrated blade and jimping on the blade spine for extra traction.

The blade is etched with the Logo of the Gunsite® Academy. The Gunsite® Academy in Arizona, is known for offering firearm training to elite military personnel, law enforcement officers and the free citizens of the US.

1.3) Hold Out I, 6", AUS 8A, 2014, 2012-16, 2021

Ideal for military and law enforcement personnel, or just law-abiding citizens who may find themselves in harm's way, the Hold Out series provide the comfort and peace of mind that comes from carrying a high-performance folder but in an astoundingly lightweight and easy to carry package.

Ounce for ounce, they may well be the strongest folding knives in the industry! Their beautiful, minimalist design is a wonder of functionality; while deceptively simple in appearance, they represent a huge array of design breakthroughs and a staggering amount of performance!

The Hold Out's beautiful satin polished blades are extremely broad; they are flat ground from the spine, with a shallow "V" cross-section culminating in a razor-sharp hand-honed edge. Continuously curved from the heel to the needle-sharp tip, the blade cuts, and shears through tough and fibrous material with ease and makes short work of tasks that would challenge many of the folding knives on the market today.

Its American G10 handle is a wonder of ergonomic design. Allowing a full and secure four-finger grip. It is wonderfully secure in the hand and will not roll or twist with use. The grip enhancing G10 and handle holes further aid traction in a wide range of grips, working equally well tip up, down in an "ice pick" grip, or even held like a push dagger!

Incredibly thin and flat, with an ambidextrous pocket clip designed for deep carry, even the largest of the Hold Out series is easily concealed in a pocket, clipped into a waistband, or tucked into a boot. The blade and handle geometry and the positioning of the Tri-Ad lock in the Hold Outs came together perfectly. Working together to create a knife whose strength versus weight ratio stunned even Cold Steel's own research and development team!

Technical Specifications

- 1) Weight: 7 oz
- 2) Blade Thickness: 3.8mm
- 3) Handle Length/Material: 7 3/16in Long G-10
- 4) Handle Blade Steel: S35VN Steel
- 5) Blade Length: 6in

- 9) Blade Length Range: 5+ in
- 10) Steel Family: CPM
- 11) Blade Shape: Drop Point

HOLD OUT SERIES

In many ways, the Cold Steel Hold Out series are ideal "EDC" or every day carry knives - providing the comfort and peace of mind that comes from carrying a high performance folder but in an astoundingly lightweight and easy to carry package.

Their beautiful satin polished S35VN steel blades are extremely functional. They are flat ground from the spine, with a shallow "V" cross-section culminating in a razor sharp hand-honed edge. Continuously curved from the heel to the needle-sharp tip, the blades cut and shear through tough, fibrous material with ease and makes short work of daily tasks and cutting chores.

Available in two sizes, the Hold Outs are incredibly thin and flat, with an ambidextrous pocket clip.

23

HOLD OUT SERIES

The Hold Out has fast become one of Cold Steel President Lynn C. Thompson's favorite folding knives. Ideal for military and law enforcement personnel, or just law abiding citizens who may find themselves in harm's way, the Hold Out series provide the comfort and peace of mind that comes from carrying a high performance folder but in an astonishingly lightweight and easy to carry package.

Once for none, they may well be the strongest folding knives in the industry! Their beautiful, minimalist design is a wonder of functionality, while deceptively simple in appearance, they represent a huge array of design breakthroughs and a staggering amount of performance!

The Hold Out's beautiful satin polished blades are extremely broad; they are flat ground from the spine, with a shallow "V" cross-section culminating in a razor sharp hand-honed edge. Continuously curved from the heel to the needle-sharp tip, the blade cuts and shears through tough and fibrous material with ease and makes short work of tasks that would challenge many of the folding knives on the market today.

Its American C-10 handle is a wonder of ergonomic design. Allowing a full and secure four-finger grip, it is wonderfully secure in hand and will not roll or twist with use. The grip enhancing C-10 and handle holes further aid traction in a wide range of grips, working equally well tip up, down in an "ice pick" grip or even held like a push dagger!

Incredibly thin and flat, with an unobtrusive pocket clip designed for deep carry, even the largest of the Hold Out series is easily concealed in a pocket, clipped into a waistband or tucked into a boot. The blade and handle geometry and the positioning of the Tri-Ad® lock in the Hold Outs came together perfectly. Working together to create a knife whose strength versus weight ratio stunned even our own research and development team!

We believe that the Hold Out may well represent the future of multi-functional, high performance every day carry knives.

1.4) Hold Out II, 4", AUS 8A (***) 2011-2016

For many years now Cold Steel has been fascinated with the Black Knife or Skean Dhu (Gaelic) of the ancient Scottish warriors. Used as a utility or back-up knife and worn under the sleeve, tucked inside a jacket or slipped into the top of a stocking it was thin, flat "pointy" and light as a feather.

Cold Steel is proud to offer you our latest interpretation of this timeless knife in the form of an updated Tactical folder we call the Hold Out. Each blade is made of our tried and true AUS 8A Stainless Steel, and like its ancient predecessor's, features a thin, acutely pointed tip that's sharp as the proverbial needle. And it glides effortlessly through even the most puncture resistant materials while remaining remarkably resistant to breakage. Adding to their value and wicked

effectiveness, each knife has been precisely and beautifully hollow ground before being honed by hand to a razor edge that will fling hairs from your arm like magic.

The handles of our Hold Out series are also reminiscent of their ancient forbearers.

Fashioned from the finest American made G-10 laminate, they offer a palm hugging profile and a thin, flat cross section that resists rolling or twisting in the palm while remaining comfortable and versatile enough to accommodate a wide variety of gripping styles.

To protect your fingers from our Hold Out's remarkably sharp blades, each knife comes with our record breaking Tri-Ad lock. Proven to way out perform the competition in the most brutal tests imaginable, it's simply the best lock available for folding knives at any price. For discreet carry and immediate access, the Hold Outs are supplied with polished stainless steel pocket clips and thumb studs on the blade. This arrangement allows a wide variety of carry options as well as lightning quick, one-handed deployment.

Technical Specifications

- 1) Blade Length: 101.6 mm
- 2) Overall Length: 228.6 mm
- 3) Blade Thickness: 3.5 mm
- 4) Blade Steel: AUS 8A
- 5) Handle Length/Material: G-10
- 6) Weight: 119 g
- 7) Locking Mechanism: Tri-Ad Lock

HOLD OUT® SERIES
NEW: NOW WITH U.S.
MADE CARPENTER CTS®
XHP ALLOY BLADE STEEL

The Hold Out has fast become one of Cold Steel President Lynn C. Thompson's favorite folding knives. Ideal for military and law enforcement personnel, or just law abiding citizens who may find themselves in harm's way, the Hold Out series provide the comfort and peace of mind that comes from carrying a high performance folder but in an astoundingly lightweight and easy to carry package.

Once for once, they may well be the strongest folding knives in the industry! Their beautiful, minimalist design is a matter of functionality; while deceptively simple in appearance, they represent a huge array of design breakthroughs and a staggering amount of performance!

The Hold Out's beautiful satin polished blades are extremely broad; they are flat ground from the spine, with a shallow "V" cross-section culminating in a razor sharp hand-honed edge. Continuously curved from the heel to the needle-sharp tip, the blade cuts and shears through tough and fibrous material with ease and makes short work of tasks that would challenge many of the folding knives on the market today.

Its American C-10 handle is a wonder of ergonomic design. Allowing a full and secure four-finger grip. It is wonderfully secure in hand and will not roll or twist with use. The grip enhancing C-10 and handle holes further add traction in a wide range of grips, working equally well tip up, down in an "ice pick" grip or even held like a push dagger!

Incredibly thin and flat, with an ambidextrous pocket clip designed for deep carry, even the largest of the Hold Out series is easily concealed in a pocket, clipped into a waistband or tucked into a boot. The blade and handle geometry and the positioning of the Tri-Ad® lock in the Hold Outs came together perfectly. Working together to create a knife whose strength versus weight ratio stunned even our own research and development team!

We believe that the Hold Out may well represent the future of multi-functional, high performance every day carry knives.

1.5) Magnum Tanto II, VG-10 SanMai, 7 1/2", w/Leather Sheath

There isn't a person working in the knife industry today that knows more about the Tanto than Cold Steel does.

It was, after all, Cold Steel who invented and popularized this knife style in the early 1980's. We have spent millions of dollars persuading the public, both through advertising and live or videotaped demonstrations, of the Tanto's many advantages.

We have been producing Tanto's for more than 30 years now, and there is still no factory or custom knifemaker around making a Tanto that can approach the cutting, slashing or piercing power of one that is manufactured by Cold Steel.

All of our Tantos feature a deep lustrous satin finish on the hollow ground blade bevels and a contrasting line grain finish on the blade flats. This technique highlights our state of the art grinding methods and emphasizes the Cold Steel Tanto's unique appearance.

In addition, the Tanto's come with our famous flattened oval Kraton handle. The oval shape provides a solid grip and resists rolling or twisting in the hand under hard use, the kind that, over time, would destroy a lesser knife.

The use of Kraton in knife handles is another Cold Steel innovation.

Kraton is an unparalleled space age material that won't crack or rot and is immune to the ravages of bad weather.

The tapered, solid steel pommel is another important Tanto feature that should not be ignored.

Lynn Thompson designed it to concentrate the full force of a crushing blow in a small area so that even a moderately powerful blow can be remarkably effective in disarming or otherwise incapacitating an attacker.

The Tanto series knives in San Mai all come with a thick, high quality Secure-Ex™ sheath that is sure to give years of hard service and keep your Tanto at your side, ready for action.

Technical Specifications

- 1) Weight: 11.4oz
- 2) Blade Thickness: 3/16"
- 3) Blade Length: 7-1/2"
- 4) Blade Steel: VG-10 San Mai®
- 5) Handle Length / Material: 5-5/8" Kray-Ex™
- 6) Overall Length: 13-1/8"
- 7) Additional Features: Secure-Ex® Sheath
- 8) Knife Type: Fixed Blade
- 9) Length Range: 5+ in
- 10) Steel Family: VG-10
- 11) Blade Shape: Tanto
- 12) Product Family: Magnum Tanto

Exhibiting an unequalled level of craftsmanship, the knives in the Tanto Series feature a lustrous satin finish on the hollow ground blade bevels and a fine grain finish on the flat spine. These two finishes characterize our state of the art grinding technique and accentuate the Tanto's unique appearance.

TANTO

Mini Tanto: Complete with all stainless steel fittings, including a traditional oval guard (tsuba), the Mini Tanto is scaled down to the smallest practical size. The result, a perfect boot/belt knife. Minimal weight and size combine with maximum sharpness, cutting power and point strength to outperform much larger knives.

Tanto: The knife that started the Cold Steel® legend. It features a beautiful stainless steel guard and pommel and a virtually indestructible 6" blade.

Master Tanto: Comparable to the original, except that its blade is San Mai III.® making it approximately 25% stronger.

Magnum Tanto II: Just two ounces heavier than the Tanto, the Magnum Tanto II provides a full 30% increase in cutting power. Combine that with the visual impact of a tsuba-style (sword) guard and you have perhaps the ideal Tanto. The Magnum Tanto II features a blade made from San Mai III.®

Magnum Tanto IX and XII: These knives were created in response to popular demand for a longer Tanto. They are available with 9" or 12" blade lengths, and both feature our exclusive San Mai III.® laminated steel.

1.6) Warcraft Tanto, 7 1/2" (*) 2021 No. 2018

...

WARCRAFT SERIES

WARCRAFT TANTO

Lynn C. Thompson has championed the awesome power of the Tanto for over 30 years. A pioneer in modern Tanto design, Lynn developed Tantos that could not only provide amazing cutting and piercing power, but perform a brutal snap cut too, making lightning fast, versatile and powerful knives that were met with great critical acclaim and widespread popularity, particularly with the Military who appreciated their robust and reliable design coupled with superior fighting functionality.

But, unlike many designers who rest upon their laurels, Lynn continued to explore, research and refine his designs, looking for ways to make better and better products. Over the next three decades Lynn has developed a wide variety of Tantos, and the Warcraft Tanto (the first in our new series of Warcraft blades) embodies his very latest thoughts and ideas regarding this truly inspiring blade shape.

The Warcraft Tanto's blade is noticeably thicker than many of the knives on the market today. With it's tough reinforced tip, elegantly curved cutting edge and sturdy one-piece construction, it is designed to soak up punishment while delivering unprecedented performance.

Made from high quality, expertly heat treated, sub zero quenched American CPM 3-V steel, the Warcraft Tanto's blade features a stout flat ground primary cutting edge and a chisel ground secondary blade bevel, both hand sharpened to hair popping sharpness. The intersection of these two blade bevels (The Yakole) forms a wickedly effective secondary point that allows for a devastating snap cut.

The Warcraft Tanto is then DLC coated - our DLC (Diamond Like Coating) is not only highly rust and scratch resistant but reduces glare and minimizes friction when cutting while making the blade incredibly hard.

During the testing process for this knife our R&D team left a prototype exposed to the elements deep in the Pennsylvania woods. After 3 months the blade was immaculate!

Its perfectly balanced taper-ground full tang is ocased in 3D machined American G-10 scales. Comfortable and secure in hand, it's equally at home as a reliable workhorse or life-saving combat knife.

Complete with our ever popular Secure-Et[®] sheath (now compatible with Yek-Lok[™] belt adapters to facilitate concealed carry under a coat or jacket), the Warcraft Tanto is rugged, dependable and as powerful as it is beautiful.

MAGNUM WARCRAFT TANTO

New for 2014! Bigger, badder and bolder! The Magnum Tanto is the latest edition to our Warcraft series.

Featuring the same game-changing DLC coated American CPM 3-V steel as its smaller brother, but with a new 12" long blade that is 1.5" wide! This huge 0 Tanto has more weight, more reach and more cutting power and performs more like a short sword than a long knife. In fact, following extensive tests with the Warcraft Magnum Tanto, Lynn Thompson himself was rendered speechless, finally exclaiming "This knife is a monster!"

Perhaps the highest quality, extreme performance production tactical fixed blade in the world, the Warcraft Magnum Tanto has raised the bar yet again.

WARCRAFT SERIES: NEW MEDIUM WARCRAFT TANTO

Lynn C. Thompson has championed the awesome power of the Tanto for over 30 years.

A pioneer in modern Tanto design, Lynn developed lightning fast, versatile knives that were met with great critical acclaim, particularly with the Military who appreciated their robust and reliable design coupled with superior fighting functionality.

Over the next three decades Lynn has continued to develop a variety of Tantos, and our Warcraft Tanto series embodies his very latest ideas regarding this inspiring blade shape.

Our Warcraft Tanto blades are noticeably thicker than many of the knives on the market today. With tough reinforced tips, elegantly curved cutting edges and sturdy one-piece construction, they are designed to soak up punishment while delivering unprecedented performance.

Made from the highest quality American CPM 3-V steel, each Warcraft Tanto's blade features a stout flat ground primary cutting edge and a chisel ground secondary blade bevel, both hand honed to hair popping sharpness. The intersection of these two blade bevels (The Yakota) forms a wickedly effective secondary point that allows for a devastating snap cut.

The Warcraft is then DLC coated (Diamond Like Coating) to make it highly rust and scratch resistant, while also reducing glare and minimizing friction.

The taper-ground thick, full tang, is encased in 3D machined textured and ergonomic USA G-10 scales, making our Warcraft series comfortable and secure in hand, and equally at home as a reliable workhorse or life-saving combat knife.

Available in three sizes, the Warcraft is quite possibly the highest quality premium tactical fixed blade in the world today.

1.7) Luzon Large, 6"

Lynn C. Thompsons love of Filipino Martial Arts encouraged this collaboration with Mike Wallace on the Luzon folder

Inspired by several balisongs in Lynns collection, but functioning as a flipper, the Luzons are a politically correct alternative for those who are unable to legally own balisongs.

The Luzons blades are comprised of 8Cr13MoV Stainless, and expertly hardened to 57-58 Rockwell and feature sharp, strong, points with just enough belly to make them equally useful for cutting and slashing. Youll be dreaming of the Philippines once you experience the Luzons bamboo-inspired handles, featuring concave segments that offer countless comfortable grip options.

Made of glass-filled nylon (GFN), the Luzons handles are impervious to the elements, and are unlike any handle weve ever made before.

Handsome and budget friendly, and a breeze to flip open, the Luzons are a formidable choice for those going in harms way. Offering incomparable levels of safety, theyre equipped with a sturdy leaf-spring lock and a (patent-pending) secondary safety mechanism that, when its engaged is extremely resistant to shock and impact. Your fingers will be safe even under the worst conditions.

Available in two sizes, both feature a lanyard hole.

Technical Specifications

1) Weight: 9.3oz

- 2) Blade Thickness: 3.5mm
- 3) Blade Length: 6in
- 4) Blade Steel: 8Cr13MoV Stainless
- 5) Handle Length/Material: 7-1/2in GFN
- 6) Overall Length: 13-1/2in
- 7) Additional Features: Safety Switch / Pocket Clip

CRAWFORD MODEL 1

Wes Crawford, the custom knife maker, has been a friend of Cold Steel® for years, so we were happy to collaborate with him on the creation of an inexpensive version of one of his proudest custom "kippers". The result was our new Crawford Model 1.

Strongly resembling Wes's custom knife, the blade features a wide saber grind and a strong, sharp point with plenty of belly for cutting and slashing. It's made from Japanese 4116 Stainless and is hollow grind to a fine, razor edge that will cut at the slightest touch.

And, because Wes's "kipper" is integrated into the tang, it can be opened lightning fast!

The handle of the Crawford Model 1 mimics Wes's original's profile and silhouette but is made from a strong (yet economical) glass-reinforced nylon that includes traction rubber inlays and a low-profile pocket clip.

To keep your fingers safe from potential harm, we have equipped the Crawford 1 with our leaf spring lock, and a (patent pending) secondary safety mechanism that, when engaged is extremely resistant to shock and impact.

Weight: 4.1 oz.
 Thickness: 3.3 mm

1.8) Kobun, 5 1/2" 2021

The Cold Steel Kobun is a lightweight knife that takes its name from the Japanese underworld, where the word "Kobun" is sometimes used as an indicator of rank that suggests the word "soldier" in, or one who takes orders from his "Oyabun" or boss.

It's a fitting name for a knife like the Kobun, which was effectively designed to be "a good soldier" in. Proven to be incredibly popular with the Military, where it's prized for its light weight and discreet profile as much as its durability and cutting potential.

The Kobun features Cold Steels iconic reinforced "American Tanto" point, making it highly resistant to bending or breaking because it is reinforced by the full thickness of the blade's spine (which runs almost to the very tip of the blade).

Despite its thin profile, the Kobun's deeply checkered Kray-Ex handle is designed to offer maximum grip and is contoured to resist turning or shifting in the hand.

Technical Specifications

- 1) Weight: 4.4oz
- 2) Blade Thickness: 3.5mm
- 3) Blade Length: 5-1/2"
- 4) Blade Steel: Japanese AUS8A Stainless
- 5) Handle Length/Material: 4-3/8" Kray-Ex™
- 6) Overall Length: 9-7/8"
- 7) Additional Features: Secure-Ex® Sheath
- 8) Knife Type: Fixed
- 9) Blade Length Range: 5+ in
- 10) Steel Family: AUS
- 11) Blade Shape: Tanto

SPECIFICATIONS:

BLADE: 5 1/2"
 OVERALL: 9 7/8"
 WEIGHT: 4.4 OZ.
 THICK: 3.5MM
 STEEL: JAPANESE AUS BA
 STAINLESS

KOBUN®

The Kobun® is a lightweight Tanto styled knife. It takes its namesake from the Japanese Yakuza, or martial underworld, where the word "Kobun" is a kind of indicator of rank that suggests the word "soldier", or one who takes orders from his "Oyabun" or boss. It's a fitting name for a knife like the Kobun®, which was effectively designed to be "a good soldier".

In profile it closely resembles our Master Tanto, but it sports a thinner blade, and that supports its main function; to be a light weight knife.

Like our Tantos, it features the Tanto styled reinforced point. This contrasts sharply with most knives on the market today which are notorious for their paper thin points which are easily broken or bent. In contrast, the Kobun's® point is highly resistant to bending or breaking because it is reinforced by the full thickness of the blade's spine which runs almost to the very tip of the blade.

The Kobun's® deeply checkered Kray-Ex™ handle is designed to offer minimum bulk with maximum grip. Its cross section was made as thin as possible (approximately 1/2 inch), then contoured to resist turning or shifting in the hand.

1.9) Peace Maker II, 5 1/2" (***)

If you're in the Military or Law Enforcement; if you ride horses or motorcycles; or live on a ranch or a farm - then the Cold Steel Peace Maker is for you!

Clipped to the top of your boot and covered by your pant leg, these versatile fixed blades are rendered virtually invisible; furthermore, your knife is always easily accessible when you need it.

The Peace Makers are astoundingly light and substantially thinner than many of the "tactical" knives available on the market today.

The Peace Makers compound - ground blade bevels makes them very easy to re-sharpen, and their stiff, distal tapered points are capable of piercing even thick material.

As these inexpensive boot blades offer a wide spectrum of uses - utility, hunting, fishing, emergency rescue and survival and of course self-defense - and our ambidextrous polymer sheaths with custom-made, stainless steel belt clips make them effortless to carry.

Technical Specifications

- 1) Weight: 5.4oz
- 2) Blade Thickness: 3mm
- 3) Blade Length: 5-1/2"
- 4) Blade Steel: German 4116 Stainless Cryo Quenched
- 5) Handle Length/Material: 4-3/4" Kray-Ex™
- 6) Overall Length: 10-1/4"
- 7) Additional Features: Secure-Ex® Sheath
- 8) Knife Type: Fixed
- 9) Blade Length Range: 5+ in
- 10) Steel Family: German Steels
- 11) Blade Shape: Clip Point

PEACE MAKER™ SERIES

If you're in the Military or Law Enforcement; if you ride horses or motorcycles; live on a ranch or a farm - or if the encroaching threats of the urban jungle are simply getting too near for comfort - then the Peace Makers are for you!

Unlike many fixed blade knives the Peace Makers can be carried very discreetly. Clipped to the top of your boot and covered by your pant leg they're rendered virtually invisible. Boot carry is incredibly comfortable (as the boot top carries the weight and suspends the knife so it doesn't rub, gunge, or irritate your body), furthermore, your knife is always easily accessible when you need it.

Astonishingly light and thin - the largest model, with its 5 1/2" blade weighs a paltry 4.7 ounces and measures less than 1/2 inch at its thickest point! That's substantially thinner than many of the alleged "extreme duty" tactical knives available today!

The Peace Maker's "Scandi" ground blade bevel makes them very easy to re-sharpen, while the unique compound ground clip point provides a very stiff, distal tapered point capable of piercing thick targets without compromising precious cutting power.

The Peace Makers offer a versatile spectrum of uses - utility, hunting, fishing, and self-defence - so it's fitting that they also have a versatile grip. They feature a thin rectangular handle with subtle contouring and a pronounced palm swell. A double quillon guard protects your precious fingers, while a thumb trough in the butt further enhances the knife's versatility by facilitating a comfortable and robust reverse grip.

Its expertly designed handles are deeply textured with a course-slipping pattern inspired by Robbie Barkman's famous Clock grip reductions which provide the leverage you need to take full advantage of its astounding cutting and piercing power!

Our ambidextrous "Secure-Ex"

sheaths are cut and stab resistant and impervious to the elements. So unlike sheaths made from leather or fabric, they'll never rot, crack, mildew, or lose their shape. Additionally, they're fitted with a custom-made, stainless steel belt clip that will stay put and keep the sheath firmly attached to your boot or belt when your knife is drawn.

1.11) Outdoorsman Lite, 6”, 2020, 4mm, w/Polimer Sheath

Cold Steel Outdoorsman Lite - создавался как бюджетный и облегченный вариант модели Outdoorsman. Он обладает схожими рукоятью, клинком, гардой и хвостовиком.

Профиль ножа полностью повторяет своего старшего брата модель, за исключением чуть более тонкого клинка, для удобства в ношении. В остальном, это тот же узнаваемый Outdoorsman. Рукоять покрыта прочным эласто-полимером Kray-Ex™, который даже в мокрых руках обеспечивает уверенный, надежный и комфортный хват. Полипропиленовая гарда придает надежности, охраняя пальцы от случайного попадания на режущую кромку. В комплекте поставляются специальные пластиковые ножны Secure-Ex® нового образца, которые неприхотливы в использовании, легко моются и довольно удобны.

Представленная версия, это обновленная версия 2021 года. Основных отличий от предшественников три. 1) Первое, клинок теперь изготавливается из стали 4116 Krupp SS. Эта немецкая сталь обладает хорошим соотношением эксплуатационных характеристик к стоимости. Сталь 4116 Krupp SS отличается неприхотливостью, пластичностью и стойкостью к ударным нагрузкам – то, что нужно рабочему ножу. 2) Второе, максимальная толщина клинка была увеличена до 4 мм., что добавило ножу ещё прочности. И 3) третье, по информации компании (на официальном сайте в описании говорится об этом), была несколько изменена рукоять (визуально особых отличий с предыдущей версией я не увидел, скорее всего был несколько изменён принцип литья и комбинации используемых материалов (Kray-Ex™ and High Impact Polypropylene).

В остальном же это «старый, добрый» и знакомый многим - «Турист».

Надежный и не маленький «полевой» нож, при этом не лишенный «своего шарма» с широчайшими вариантами применения и по весьма демократичной цене.

Technical Specifications

- 1) Длина общая: 279,4 мм.
- 2) Длина клинка: 152,4 мм.
- 3) Толщина клинка: 4,0 мм.
- 4) Вес(без ножен): 184 г.
- 5) Материал клинка: 4116 Krupp SS (57HRC).
- 6) Материал рукояти: Kray-Ex™ and High Impact Polypropylene.
- 7) Ножны: Secure-Ex®.

1.12) Pendleton Lite Hunter, 3 5/8" 2015, w/Core-Ex Sheath (*)

Over the years our Pendleton Hunters have become enormously popular, and many people have asked us for a more affordable Pendleton that will accommodate just about anyones budget.

In appearance, the Pendleton Lite Hunter strongly resembles Lloyds classic functional designs, with a practical drop point blade, modest guard, hollowed bolster area, and a flared butt to aid retention in slippery and inclement conditions.

The only major changes were the adoption of subzero cryo quenched German 4116 Stainless steel and the use of high-impact polypropylene for the handle. If you are looking for a dependable and award winning hunting / utility knife that will serve you well for years to come - then you would be hard pressed to beat the Pendleton Lite Hunter.

Technical Specifications

- 1) Weight: 2.7oz
- 2) Blade Thickness: 3mm
- 3) Blade Length: 3-5/8in
- 4) Blade Steel: German 4116 Stainless Cryo Quenched
- 5) Handle Length/Material: 4-7/8in High Impact Polypropylene

- 6) Overall Length: 8-1/2in
- 7) Additional Features: Secure-Ex® Sheath
- 8) Knife Type: Fixed
- 9) Blade Length Range: 3-5 in
- 10) Steel Family: German Steels
- 11) Blade Shape: Drop Point

ROACH BELLY™

The historical Roach Belly knife was a short blade with a pronounced upswept curve and a sharp point. It was most likely named after the common Roach Fish, which had a similarly round curving belly. It was known in 17th century Britain and the American Colonies.

Cold Steel's interpretation of this knife is a nod to the Black Powder Community, which has continued to appreciate the Roach Belly's economy, versatility and effectiveness. It retains the profile of the original but incorporates modern materials for its construction. The hollow ground blade is made of German 4116 Stainless, expertly heat treated to Rc 56-57, and given a fine sharp edge that's easy to maintain. Instead of the traditional wood handle, ours is made of tough Polypropylene, so it's impervious to the elements and won't swell, shrink, rot or crack the way wood does.

The Roach Belly comes with a pouch style black Cor-Ex™ sheath. The sheath has a generously sized belt loop and also converts readily to being worn as a neck knife.

CANADIAN BELT KNIFE

The Cold Steel Canadian Belt Knife takes inspiration from an old 1950's classic. It has all the features that made the original an award-winning, international favorite plus some modern improvements. Our more contemporary version is made out of German 4116 Stainless steel and hollow ground to a razor edge. It will glide through just about any material because its elliptical profile is very efficient at reducing cutting drag.

The Polypropylene handle is equally efficient, fitting snugly in virtually any hand. It's slightly offset in relation to the blade to keep one's fingers safely out of the way. Light and tough enough to endure hard knocks, it will never break or fall apart in the way a traditional wood handle is prone to do.

This 2 ounce blade comes with a pouch style black Cor-Ex™ sheath. It's light, slim and compact enough to carry on your belt or wear it slung from a cord around your neck day in and day out.

FINN BEAR

Reflecting the best of its Finnish heritage, the Finn Bear is ideal for use in the great outdoors, and makes an efficient utility knife as well!

The German 4116 Stainless blade is hollow ground and given an Rc hardness of 56-57, so it will hold a good edge and is easy to re-sharpen. Its blade shape is practical because of its good sturdy point for piercing and long belly for skinning, cutting and carving. It's big and strong enough to skin a moose, yet thin and delicate enough to slice a tomato or cut up an apple.

The Polypropylene handle is straight with a slightly ribbed texture for traction. Its modified diamond cross section will fit your hand like a glove and accommodate a wide variety of gripping methods.

For safety and convenience, the Finn Bear comes with a deep pouch style Cor-Ex™ sheath and generously sized belt loop so it can be worn on the waist, slung around the neck or tossed into a duffle bag or tackle box.

PENDLETON LITE HUNTER

Over the years our Pendleton Hunters have become enormously popular, and while we think they are reasonably priced, many have asked us for a more affordable Pendleton that will accommodate just about anyone's budget.

So we got together with Lloyd and designed a new knife we call the Pendleton Lite Hunter. In appearance it strongly resembles the rest of the family with a drop point blade, modest guard, hollowed bolster area and a flared butt to aid retention. The only major changes were the adoption of more affordable German 4116 Stainless steel and the use of polypropylene instead of Kray-Ex™ for the handle.

In our testing it got straight A's in the field as it is equally adept at field dressing and skinning, held a decent edge, was easy to sharpen, and proved to be tough as nails.

If you're looking for a very affordable hunting/utility knife that comes with a good, pouch-style sheath and delivers more than your money's worth in performance and value look no further than the Pendleton Lite.

1.13) Talwar, 5 1/2", S35VN, 3rd gen, 2021

"If you have watched me perform cutting demos, you'll have doubtlessly seen me using a big 5 1/2" Talwar. Why?

Because its blade is extra wide, with a thin V shaped cross section and an upswept point. All these features add up to make it one of the best high-performance folding knives in the world.

You won't see our competitors duplicate the cutting feats of a 5 1/2" Talwar for one reason, they can't!

Sold with a super strong G-10 handle and an incomparable Tri-AD locking mechanism, our big Talwar is a steal if you want big knife performance from a folder!" - Lynn Thompson

Technical Specifications

- 1) Weight: 8.6 oz

C-10 HANDLES. JAPANESE AUS 8A BLADES

TALWAR™

During the 1800's the British Empire was hell bent on gobbling up as much of the Indian sub-continent as they could, seizing dominion with massive fire power and the point of the bayonet.

But when the British attempted to subdue the Sikhs and other martial clans they received a very rude awakening!

Suddenly soldiers and cavalymen alike began literally losing their heads — not to mention their arms and legs- to a fearful Indo-Persian sword called the Talwar™!

With its razor sharp broad, curved blade it stopped the British cold in many battles and inflicted unheard of losses and the most ghastly wounds imaginable.

Now, almost two hundred years later Cold Steel has harnessed the fearsome cutting power of one of the world's most renowned swords in a tactical folder that we believe is truly worthy of the name Talwar.™

Designed by celebrated custom knife-maker Andrew Demko and Cold Steel President Lynn C. Thompson, the largest of our diverse new Talwar™ series boasts one of the widest blades available. Flat ground, with a continuously curved cutting edge from choil to up-swept point it offers cutting and piercing power hitherto unavailable in a folding knife.

To compliment the Talwar's™ razor edge and lethal point we developed a truly exceptional handle.

Made from American C-10, its textured and contoured pistol grip handle features strategically placed finger grooves for comfort and safety, and to further protect your precious fingers from this formidable blade, we have equipped the Talwar™ with our industry-leading Tri-Ad™ lock. Tried and tested, this super safe locking mechanism has proven to be unequalled by any folding knife lock in the industry — at any price!

Faster on the draw than any switchblade, our Talwar™ comes equipped with Andrew Demko's revolutionary ambidextrous thumb plate. By draw-snagging the knife on a pocket the awesome power of the Talwar™ can be in your hand at the speed of lightning!

8 FOLDING KNIVES

TRIPLE ACTION™

PACKING AN AWESOME PUNCH, COLD STEEL'S® TRIPLE ACTION™ PROVES THAT THE POWER AND STRENGTH OF A FORMIDABLE CUTTING TOOL DOESN'T REQUIRE A FOLDING KNIFE WITH THE WEIGHT OF AN ANVIL.

CLOSING TO A LENGTH OF ONLY 5 INCHES AND WEIGHING ONLY 3.5 OUNCES, THE TRIPLE ACTION™ FOLDING KNIFE IS A DYNAMITE INNOVATION.

A SUPER-TOUGH BLADE OF AUS 8A STAINLESS STEEL PROVIDES SUPERB CUTTING ABILITY IN THE WORLD'S FINEST COMBINATION OF BLADE STRENGTH AND FLEXIBILITY. THE AIRCRAFT GRADE ALUMINUM HANDLE (ROLL ENGRAVED WITH A DISTINCTIVE PATTERN) GIVES THE TRIPLE ACTION™ AN EXCEPTIONAL LOOK, AND THE POCKET CLIP MAKES IT EASY TO CARRY.

COLD STEEL'S® TRIPLE ACTION™ FOLDER IS AMONG THE SAFEST KNIVES YOU CAN CARRY. WHEN CLOSED, THE BLADE IS TOTALLY ENCAPSULATED BY THE LOCKING COVER, AND WHEN OPEN THE SOLID ALUMINUM CONSTRUCTION AND HEAVY DUTY

LOCK PREVENT THE BLADE FROM CLOSING. SO, THE TRIPLE ACTION™ FOLDER IS AS STRONG AS (OR POSSIBLY EVEN STRONGER THAN) A BUTTERFLY KNIFE WHILE ALSO BEING LEGAL TO CARRY IN MOST STATES WHERE THE BUTTERFLY IS BANNED.

WHEN CLOSED, THE TRIPLE ACTION™ FOLDER IS A FORCE TO BE RECKONED WITH. ITS SOLID CONSTRUCTION MAKES IT VERY STIFF, STRONG, AND UNYIELDING IN TOUGH SITUATIONS, GIVING ITS USER CONFIDENCE IN ITS EFFECTIVENESS AND ELIMINATING ANY FEAR OF BREAKING THE KNIFE. REMARKABLY WELL SUITED FOR USE AS AN IMPACT WEAPON TO ATTACK AN OPPONENT'S NERVE CENTERS AND REPEL OR SUBDUCE AN ASSAILANT, THE CLOSED TRIPLE ACTION™ SERVES ADMIRABLY AS AN IMPROVISED "YAWARA" STICK. BECAUSE IT IS EXTREMELY THIN AND FLAT, THE HAND ENCIRCLES IT COMFORTABLY AND COMPLETELY, PROMOTING A VERY SECURE GRIP WHICH WILL ALLOW THE STRIKING OF POWERFUL BLOWS.

THE SPECTRE™

INSPIRATION FOR THIS NEW TACTICAL FOLDER CAME FROM CUSTOM KNIFE MAKER BARRY DAWSON'S NECK KNIFE DESIGN. THAT KNIFE FEATURED A SLENDER BLADE, AND A THICK SPINE WITH A ZERO GROUND EDGE AND A SKELETONIZED HANDLE. IT WAS SUCH A COMPELLING CONCEPT THAT WE CREATED OUR OWN LINE OF KNIVES BASED UPON BARRY'S ORIGINAL DESIGN, THE "SPIKE™" SERIES (SEE PAGE 31). NOW WE'VE PRODUCED A NEW FOLDING VARIATION ON THAT THEME THAT WE CALL THE SPECTRE™.

SPECIFICATIONS: The Spectre™ (#60SF)

Blade: 4"
Overall: 8 3/4"
Thick: 5mm
Weight: 3 oz.
Steel: San Mai III®

THE BLADE EVOKES BARRY'S ORIGINAL IDEAS, BUT IS ENHANCED BY A MIRROR POLISHED SURFACE AND IS STYLED WITH OUR OWN TALON POINT, A BLADE STYLE WHICH OFFERS ABSOLUTELY FEROCIOUS RIPPING, CUTTING AND SLASHING POWER WITHOUT COMPROMISING THE POINT'S ABILITY TO BE USED FOR PIERCING.

THE SPECTRE™ IS EXTREMELY LIGHT WITH A LEAN PROFILE THAT FITS THE HAND EXCEPTIONALLY WELL WHILE OFFERING A GOOD SOLID GRIP. IT HAS SOLID TITANIUM LINERS TO GIVE ITS UNDERSTRUCTURE SUPERIOR STRENGTH AND THE IMPRESSIVE BLACK MICARTA SCALES AND POLISHED TITANIUM BOLSTERS GIVE IT A SOPHISTICATED EXTERIOR. ITS SO STUNNINGLY HANDSOME, YOU'LL BE CONSTANTLY LOOKING FOR EXCUSES TO LIFT IT OUT OF YOUR POCKET TO JUST TO SHOW IT OFF.

FOR SAFETY AND CONVENIENCE THE SPECTRE™ FEATURES OUR PEERLESS LEAF SPRING LOCKING MECHANISM. SEVERAL YEARS OF TESTING AND SUBTLE IMPROVEMENTS IN CONSTRUCTION HAVE MADE THIS ONE OF THE SAFEST AND MOST RELIABLE LOCKS AVAILABLE AT ANY PRICE.

FOR EVEN GREATER VERSATILITY AND USEFULNESS, WE HAVE OUTFITTED THE SPECTRE™ WITH A SLIM, YET STYLISH, POCKET CLIP AND THUMB STUD SO YOU CAN CLIP IT TO THE POCKET OF THIN, LIGHT WEIGHT TROUSERS OR A COAT POCKET AND OPEN IT IN A FLASH WHEN NEEDED.

1.15) Ti-Lite 4, Aluminum, Boguszewski Design

Cold Steels Ti-Lite folding knives evoke the sleek speed and rebellious lines of the classic 1950s switchblade.

They feature sharp and strong bead-blasted CPM-S35VN Alloy blades, and CNC milled 7075 Aluminum handles which are finished with a protective EDP (Electric Discharge Plating) coating.

The Ti-Lites are equipped with our patent pending, stainless steel leaf spring locks (proven, in our tests, to hold upwards of 145lbs).

For ease of carry, the Ti-Lites come equipped with a small, but unobtrusive steel pocket clip, and can be opened rapidly by using the thumb studs or by snagging a quillon on the edge of your pocket as you draw your knife out.

Technical Specifications

- 1) Weight: 4.6oz
- 2) Blade Length: 4in
- 3) Blade Steel: S35VN
- 4) Handle Length/Material: 4-3/4in 7075 Aluminum
- 5) Overall Length: 8-3/4in
- 6) Additional Features: Ambidextrous Pocket / Belt Clip
- 7) Knife Type: Folder
- 8) Product Family: Ti-Lite
- 9) Blade Length Range: 3-5 in
- 10) Steel Family: CPM
- 11) Blade Shape: Spear Point
- 12) Locking Mechanism: Spring Leaf Lock

Reminiscent of a 1950's styled "James Dean" switchblade, our new Ti-Lite™ tactical folder, echoes the swift lines of a memorable classic.

Ti-Lite™

Legal to carry almost everywhere, the AUS BA stainless steel blade features a razor edge and sturdy needle sharp point. The handle, made of forged Titanium, has been CNC milled for a dashing look, and for maximum strength and safety, we have equipped our Ti-Lite™ with a full length Titanium leaf spring lock (proven, in our tests, to hold 100lbs).

For ease of carry, the Ti-Lite™ comes equipped with a small, unobtrusive steel pocket clip.

We would like to thank custom knife maker Phil Boguszewski for his design influence in the creation of the Ti-Lite™.

[Back to Home](#)

1.16) Recon 1, Clip Point Serrated Ultra Lock (***)

Our Recon 1 tactical folders are sure to set a new standard that will be hard to beat, because they are as tough as nails and cut like a chain saw! Every facet of their construction has been over engineered to make them as strong, durable and effective as possible. The blades are made out 440A Sub Zero Quenched stainless steel and the handles are thick Zytel®, massively reinforced by heat treated steel liners and five locking bolts. To compliment their super tough blades and handles, they each feature our revolutionary Ultra Lock™ (patent pending) which practically precludes lock failure.

To compliment their tactical mission we have given each blade a tough black Teflon® finish. Our testing has shown this coating or finish offers three major advantages for use on tactical blades. The first is; it is highly resistant to scratches and abrasions while keeping rust at bay. Secondly, it eliminates glare and light reflections which may give its user away. The third advantage is that it's a superior lubricant which causes the blade to slip through even tough materials with markedly less friction. This means you can cut deeper and far longer than with a non Teflon® coated blade.

To make the Recon 1 as easy to carry as possible, we have equipped each knife with a small, extra strong pocket clip. This clip is completely ambidextrous and its diminutive size doesn't abrade and irritate the palm under protracted use like a larger clip would.

RECON 1™

ULTRALOCK™

As the knife is opened, the blade rotates around the locking pin via a larger cut channel in the blade tang. Prior to reaching the fully opened position, the spring loaded locking pin moves forward through the incoming straight portion of the tang channel until it "dead ends". At this point the blade is rigidly locked open and can't budge as the locking pin is surrounded by solid steel which prevents any movement of the blade. In fact, this lockup is so strong it can only be overcome in two manners. The first is to apply so much force to the blade that the locking pin shears off or breaks through the solid steel blade tang. The second is to manually retract the locking pin far enough that it escapes the straight part of the channel.

RECON 1

Cold Steel® is famous for raising the bar in the knife industry and our new Recon tactical folders are sure to set a new standard that will be hard to beat. Why? Because they are as tough as nails and will cut like a chain saw! We have pulled out all the stops when we made these knives.

Every facet of their construction has been over-engineered to make them as strong, durable and effective as humanly possible. The blades are made out of our proven AUS-8A stainless steel and the handles are thick Zytel®, massively reinforced by heat-treated steel liners and five locking bolts. To complement their super tough blades and handles they each feature our revolutionary Ultra Lock™ (patent pending) which practically precludes lock failure.

To complement their tactical mission we have given each blade a tough black Teflon® finish. Our testing has shown this coating or finish offers three major advantages for use on tactical blades. The first is it is highly resistant to scratches and abrasions while keeping rust

at bay. The second is it eliminates glare and light reflections which may give the user away. The third is it's a superior lubricant which causes the blade to slip through even tough material with markedly less friction. This means you can cut deeper and far longer than with a non Teflon® coated blade.

To make the Recon 1 as easy to carry as possible we have equipped each knife with a small, extra strong pocket clip. This clip is completely ambidextrous so it's take note. What's more its diminutive size doesn't abrade and irritate the palm under protracted use like a larger clip would.

ULTRA LOCK™

After 2 years of experimentation and testing, Cold Steel® is proud to introduce our new Ultra Lock™. We believe this revolutionary locking mechanism (patent pending) is as "fool proof" as it gets and represents a big advancement in safety. The way the lock works is as the knife is opened the blade rotates in a semi circular manner around the locking pin via a larger cut channel in the blade tang. Then just prior to reaching the fully opened position the spring loaded locking pin moves forward through the oncoming straight portion of the tang channel until it "dead ends". At this point the blade is tightly locked open and can't budge even a fraction of an inch as the locking pin is surrounded by solid steel which prevents any movement of the blade. In fact this lockup is so strong it can only be overcome in two manners. The first is to apply so much force to the blade that the locking pin shears off or breaks through the solid steel blade tang. The second is to manually retract the locking pin far enough that it escapes the straight part of the channel. Once this is done the curve portion of the channel can engage it and once again rotate it as the blade is closed.

The Recon 1 comes complete with an ambidextrous black steel pocket clip.

RECON 1®

Cold Steel® is famous for raising the bar in the knife industry and our Recon 1® tactical folders are setting a standard that's hard to beat. Why? Because they are as tough as nails and will cut like a chain saw! Every facet of their construction has been over engineered to make them as strong, durable and effective as humanly possible. The blades are made out of Japanese AUS 8A stainless steel that's been vacuum heat treated and sub zero quenched, and the handles feature G-10 laminate scales, massively reinforced by heat treated steel liners and five locking bolts. To compliment their super tough blades and handles, they each feature our revolutionary Ultra Lock™, which practically precludes lock failure.

To compliment their tactical mission, we have given each blade a tough black Teflon® finish. Our testing has shown this coating offers three major advantages for use on tactical blades. First, it helps the blade to resist rust. Second, it eliminates glare and light reflections which may give its user away. Third, it's a superior lubricant, which causes the blade to slip through even tough material with markedly less friction. This means you can cut deeper and far longer than with a non-Teflon® coated blade.

To make the Recon 1® as easy to carry as possible, we have equipped each knife with a small, extra strong pocket clip. This clip is completely ambidextrous so lefties take note. What's more, its diminutive size doesn't abrade and irritate the palm under protracted use like a larger clip would.

ULTRA LOCK®

WE BELIEVE THIS REVOLUTIONARY LOCKING MECHANISM IS AS "TOOL PROOF" AS IT GETS AND REPRESENTS A BIG ADVANCEMENT IN SAFETY.

THE WAY THE LOCK WORKS: AS THE KNIFE IS OPENED THE BLADE ROTATES IN A SEMI CIRCULAR MANNER AROUND THE LOCKING PIN VIA A CUT CHANNEL IN THE BLADE TANG. THEN JUST PRIOR TO REACHING THE FULLY OPENED POSITION THE SPRING LOADED LOCKING PIN MOVES FORWARD THROUGH THE ONCOMING STRAIGHT PORTION OF THE TANG CHANNEL UNTIL IT "DEAD ENDS". AT THIS POINT THE BLADE IS MODICALLY LOCKED OPEN AND CAN'T BUDGE EVEN A FRACTION OF AN INCH AS THE LOCKING PIN IS SURROUNDED BY SOLID STEEL WHICH PREVENTS ANY MOVEMENT OF THE BLADE. IN FACT, THIS LOCKUP IS SO STRONG IT CAN ONLY BE OVERCOME IN TWO MANNERS; THE FIRST IS TO APPLY SO MUCH FORCE TO THE BLADE THAT THE LOCKING PIN SKEARS OFF OR BREAKS THROUGH THE SOLID STEEL BLADE TANG. THE SECOND IS TO MANUALLY RETRACT THE LOCKING PIN FAR ENOUGH THAT IT ESCAPES THE STRAIGHT PART OF THE CHANNEL. ONCE THIS IS DONE, THE CURVE PORTION OF THE CHANNEL CAN ENGAGE IT AND ONCE AGAIN ROTATE AROUND IT AS THE BLADE IS CLOSED.

1.17) Recon 1, Tanto Point 50/50 Serreted Tri-Ad Lock

A popular knife with Military and Law Enforcement Personnel, Fire and Rescue crews as well as civilians who appreciate a hardworking, dependable tool for any occasion.

Sharp as a scalpel and tough as a tank, the Recon Series is available with 2, 3, 4, and 5 1/2 inch blades, and every facet of their construction has been over engineered to make them as strong, durable and effective as humanly possible.

These Cold Steel classics are thin, light, razor sharp and amazingly strong!

Every model in this diverse series features our world renowned Tri-Ad lock, making them almost impervious to shock and keeping your precious fingers safe from harm when using your knife in even the most taxing conditions. From the sturdy little workhorse that is our Micro series to the beastly cutting power of our XL Recon series and all the knives in between - whatever your mission, the Recon I is there for you!

*All of the Recon 1's have S35VN blades and G-10 handles, except for the Micro Recon 1's, which have an AUS 8A Tuff-Ex™ Coated Blade, and a G-10 styled Griv-Ex™ handle.

COLD STEEL®

World's Strongest, Sharpest Knives

RECON 1® SERIES

Cold Steel is famous for raising the bar in the knife industry and our Recon 1® tactical folders are setting a standard that's hard to beat. Why? Because they are as tough as nails and will cut like a chain saw! Every facet of their construction has been over engineered to make them as strong, durable and effective as humanly possible. The blades are made out of imported Japanese AUS 8A stainless steel that's been vacuum heat treated and sub-zero quenched and the handles feature G-10 laminate scales artfully contoured and scalloped for a terrific non slip grip. Plus, they are held together by the latest in high strength mechanical fasteners and further anchored by a 6061 heat-treated spacer. To compliment their super tough blades and handles they are equipped with our revolutionary Tri Ad lock™ (see page 4), which practically precludes lock failure.

To compliment their tactical mission we have given each blade a tough, black, Teflon® finish. Our testing has shown this coating offers three major advantages for tactical blades. First, it helps the blade to resist rust. Second, it eliminates glare and light reflections, which may give its user away. And third, it's a superior lubricant, which causes the blade to slip through even tough material with markedly less friction. This means you can cut deeper and far longer than with a non-Teflon® coated blade. To make the Recon 1® as easy to open and carry as possible we have equipped each knife with a thumb disc and small extra strong pocket clip. This clip is completely ambidextrous so lefties please take note. What's more its small size doesn't abrade or irritate the palm under protracted use.

Thin, light, sharp and incredibly tough, the Recon 1® is willing and able to aid you on your next mission!

RECON 1® SERIES

Cold Steel is famous for raising the bar in the knife industry and our Recon 1® tactical folders are setting a standard that's hard to beat. Why? Because they are as tough as nails and will cut like a chain saw! Every facet of their construction has been over engineered to make them as strong, durable and effective as humanly possible. The blades are made out of imported Japanese AUS 8A stainless steel that's been vacuum heat treated and sub-zero quenched and the handles feature G-10 laminate scales artfully contoured and scalloped for a terrific non slip grip. Plus, they are held together by the latest in high strength mechanical fasteners and further anchored by a 6061 heat-treated spacer. To complement their super tough blades and handles they're equipped with our revolutionary Tri-Ad lock™, which practically precludes lock failure.

To complement their tactical mission we have given each blade a tough, black, Teflon® finish. Our testing has shown this coating offers three major advantages for tactical blades. First, it helps the blade to resist rust. Second, it eliminates glare and light reflections, which may give its user away. And third, it's a superior lubricant, which causes the blade to slip through even tough material with markedly less friction. This means you can cut deeper and far longer than with a non-Teflon® coated blade. To make the Recon 1® as easy to open and carry as possible we have equipped each knife with a thumb stud and a small, extra strong pocket clip. This clip is completely ambidextrous so lefties please take note. What's more its small size doesn't abrade or irritate the palm under protracted use.

1.18) Voyager Tanto Pt. Seretted (*)

...

VOYAGER® SERIES

Due to their light weight and convenience, Zytel® handled lockbacks have gained enormous popularity over heavier, traditional lockbacks with their metal bolsters and wooden scale handles. Our Voyager® Series is the new generation of these ultra-light knives and are sure to be the standard by which others are judged for years to come!

The Voyager® Series are made from the same premium stainless steel that goes into our famous Tanto. They feature precision milled and hand fitted parts with extra stiff springs. This provides a lock that is safer and stronger than most traditional folders. The blades are extremely wide and ground thin at the edge for tremendous shearing potential. This thin edge allows us to hone the blade to astounding sharpness. Plus, the cutting surface is continuously curved along its entire length for the most efficient possible slicing action. Because of the high carbon content in the stainless steel, you'll find that the sharpness really lasts a surprisingly long time.

If you like serrations, you'll really appreciate our exclusive pattern. It offers the aggressive ripping action of serrated teeth, but with a twist. Our design features groups of very small teeth separated by wide, shallow arcs. This results in the benefits of both a plain and a serrated edge, so that the knife still cuts smoothly through almost any material.

The Voyager® Series offers all the advantages of the latest in lockback construction technology including lightening-quick one-handed opening, light weight and strength, yet without the necessity for unsightly humps or holes in the blade. The result is an appealing look with very modern styling. Every detail has been designed for maximum performance from the reinforced pivot pin and integral clip, to the grooved thumb shelf on the back of the knife for extra traction. Plus, the handle offers a superbly comfortable non-slip grip and houses the blade in a sleek, super-light package that can be carried all day without effort.

As tools, these lightweight, super sharp knives are appropriate in almost any environment from hunting and camping, to hiking and general utility chores. They can also readily fill specialty functions such as a boat or river knife, a chute knife or demanding police/survival/rescue applications.

TUFF-LITE™ VOYAGERS®

Tough enough to do the job and light enough to be handy, the Cold Steel® Tough-Lite's® are there when you need them. They come complete with a lanyard hook so they easily attach to any keychain, belt loop, zipper pull, or neck lanyard.

Quality counts, even in small packages, so we made the Tuff Lite™ Voyagers® with reinforced pivot pins and lockwork that is capable of holding more than 40 pounds! The Zytel® handled Tough Lites are flat and light enough to be carried all day without effort in the pockets of even tropical weight pants.

WHAT SHOULD YOU EXPECT FROM A COLD STEEL FOLDER?

SHARPNESS

The true measure of a knife's sharpness and cutting power is its ability to cut free hanging Manila rope. The abrasive nature of the hemp fibers offer an excellent test of a knife's edge holding ability. Most of Cold Steel folder's have been tested in this fashion.

STRENGTH

Cold Steel folders have been tested (and proven) to withstand more weight pressure on their locks than 99% of our competitor's like models.

The photo below illustrates how these tests are done. Note how far the weight is placed from the pivot point, putting the lock under maximum strain. If you value your fingers, lock strength should be a primary consideration when purchasing a folding knife.

The tests shown above are documented in our video "PROOF". These tests are dangerous and should not be duplicated. They constitute gross abuse of a knife. Duplicating them will void your Cold Steel warranty.

Test Results for Cold Steel Voyagers®

Blade Style	Weight Pressure	Severed Manila Rope
Tuff-Lite	40lbs.	N/A
Med. Clip Pt.	70lbs.	1"
Lg. Tanto Pt.	100lbs.	1 1/2"
X Lg. Clip Pt.	125lbs.	2"

THERE ARE 14 FOLDERS IN THE VOYAGER® SERIES. EACH IS A TESTAMENT TO STRENGTH, SHARPNESS, AND OUTSTANDING CRAFTSMANSHIP.

1.19) Master Hunter, Carbon V Steel 4 1/2" (*)

Retaining it's classic lines and functional design, but with the integration of some of the finest materials in the industry today.

Featuring an extra broad American CPM3-V High Carbon Steel blade and honed by hand to a razor sharpness that has to be felt to be believed. The Master Hunters curved cutting edge slices effortlessly through even the toughest hide, while its stout but sharp drop point makes field dressing and skinning a breeze. The spine of the blade is a full 3/16" thick to allow for the necessary strength and stiffness to field dress and skin even the biggest animals.

The grip is specially designed to promote long use without fatigue. Made of the shock absorbent Kray-Ex™, and featuring our deeply checkered surface, it won't slip no matter how cold, wet or bloody your hands get, and it will give you a positive and secure purchase on your blade even when wearing thick gloves.

Plus, Kray-Ex™ has specially enduring advantages for a hunter, in that it will never rot, shrink, crack, splinter, or mildew, and is completely impervious to even the harshest weather.

For safety, the Master Hunter comes in a adaptable and versatile Secure-Ex™ sheath that will accommodate just about any belt, pack or rig. the perfect companion for a dedicated hunter who deserves the very best - The Master Hunter by Cold Steel.

Master Hunter

The Master Hunter comes complete with a high quality, black Cordura sheath.

This terrific hunting knife is made right here in the USA from Carbon V® steel.

Its thick, broad blade has been flat ground extra thin with a distinct distal taper for unprecedented cutting ability, edge retention and ease of re-sharpening. The extra keen edge cuts like a straight razor and the dropped point simplifies the task of field dressing and skinning. Plus, the comfortable, well designed grip encourages long use without fatigue. This is the new

standard for an American-made hunting knife.

The Master Hunter has been extensively field tested in Africa, Australia, Alaska and Colorado on over 50 species of big game. It has won the praise of some of the world's finest hunters including Ross Seyfried of Guns and Ammo.

The Master Hunter is also available in our premium AUS 8A Stainless steel for easier maintenance after use.

1.20) 3V Pendleton Hunter, 3 1/2" (*) 2019

...

PENDLETON SERIES

Our company president, Lynn C. Thompson, bought the first knife that custom maker, Lloyd Pendleton ever made in 1973. The two went on to be fast friends, and together they collaborated on some of the finest hunting knives in the industry, the Pendleton Series.

PENDLETON HUNTER

The Pendleton Hunter is one of the most popular hunting knives in our line-up. Much loved by the hunting community, it has remained a staple in our collection for many years.

Lloyd Pendleton's innovative drop point blade makes skinning and field dressing even large game a breeze.

The Pendleton Hunter's thick spine, combined with its deep wide hollow grind result in a very versatile point combined with a razor sharp edge.

The subtle contoured handle supports a modest guard and thumb stop while still facilitating a wide range of grips for the intricacies of processing game. The deeply checkered Kray-Ex® handle also helps the hunter to retain a secure grip on the knife even when his or her hands are cold, wet and bloody.

IMPROVED PENDLETON MINI HUNTER

Our Mini Hunter was designed with one goal in mind, to pare down a functional hunting knife to the smallest size that practicality would allow.

Capable of skinning, dressing and processing even large game, this diminutive hunting knife is an indispensable tool that will make a perfect addition to any hunting or camping pack or survival kit.

Newly improved for 2015 with an upgraded handle for a secure 4 finger grip, the Pendleton Mini Hunter also comes complete with a tough, weather resistant Secure-Ex® sheath, locking it safely in place, while remaining light enough to carry 24 hours a day.

NEW FOR THIS YEAR

Our Pendleton Hunter and Mini Hunter are now also available in premium American CPM 3-V High Carbon Steel, with a hard wearing DLC (diamond like) coating for superior durability in the field.

PENDLETON CUSTOM CLASSIC

Made as a super limited edition, and highly collectible, the Pendleton Custom Classic duplicates the fit, finish and aesthetics of Lloyd Pendleton's celebrated custom drop point hunter.

Its hand crafted and beautifully polished blade is hollow ground from Japanese VG-1 San Mai III® and boasts state of the art vacuum heat treatment, a sub-zero quench, and multiple tempering.

Lloyd's guard and integral bolster are precision machined from stainless steel and skillfully polished.

The Custom Classic features a single short quillon and a unique "thumb print" on the bolster to allow any number of grip options. The handle is also a faithful copy of Lloyd's original. Featuring a red fiber liner that accents the knife's full tang, and twin contoured hamile scales made of highly polished black linen Micarta and six steel retaining pins.

A heavy, pouch-style cowhide sheath is included to complement the traditional appearance of this hunting classic.

1.21) Western Hunter, 6", 2009 w/Core-Ex Sheath (***) 2008-2009

...

WESTERN HUNTER™ & LONG HUNTER

(#36PE)
WESTERN HUNTER

SPECIFICATIONS:

	WESTERN HUNTER	LONG HUNTER	(#36PS) LONG HUNTER
BLADE:	6"	7"	
OVERALL:	10 3/8"	11 1/2"	
WEIGHT:	6.1oz.	7.5oz.	
THICK:	1/8"	1/8"	

In the 1990's, Cold Steel introduced a series of four low cost knives we called the "Frontier Series". They were based on classic, 100 year old blade designs and made from our exclusive Carbon V® steel and featured simple hickory scale handles. They were enormously popular with our customers. Discontinuing them a few years after they were introduced was regrettable but necessary because of insurmountable manufacturing problems and rising costs.

This year we are very pleased to re-introduce two newly improved versions of those same blade styles. The blades are made from the same 4116 Krupp steel that's used in the most expensive German cutlery, and the handles are made of durable, super tough polypropylene which won't warp, crack, shrink or swell up the way wood does. And, both knives come complete with a sturdy pouch-style Cordura sheath.

WESTERN HUNTER™

Based on a design that harkens back to the late 1800's, the Western Hunter's™ practical blade style was popular and wildly successful and eventually adopted at first by individual butchers and later the meat packing industry in general. This happened mostly because of the Western Hunter's™ inexhaustible versatility and simple, no-nonsense usefulness.

Our version integrates the original profile and incorporates a flat ground blade with a thin, keen edge. This blade shape lends itself to a variety of uses because the edge runs in a mild continuous curve two thirds of the way up the blade where it transitions to a more pronounced curve (forming the perfect "belly" for long skinning strokes) before terminating in a sharp, yet useful point.

This is your chance to own our modern recreation of a blade that has proven itself ideal for skinning everything from Field Mice to Grizzly Bears!

LONG HUNTER

At the close of the French and Indian War, legend has it that English fur traders, angry over a slew of recent atrocities began to refer to the common French peasant/kitchen knife they had sold to the Indians for years as a "Scalper". Our modern re-creation, which we call the Long Hunter, is useful for all kinds of utility chores like field dressing, skinning or even quartering big game. It has a sharp, yet sturdy point for piercing and a moderately curved blade with an extra thin edge that facilitates cutting, slashing, chopping and shearing strokes.

While the scalper has always been a tool, there is no doubt it could (and has) serve in a pinch as a frighteningly efficient weapon. Its point, while quite strong, is still very sharp and will pierce with dagger like ease. And its broad, flat ground blade is capable of delivering astonishingly deep cuts and slashes.

1.22) Double Agent I, 3"

Designed by custom knife-maker Zach Whitson, Cold Steel's Double Agent neck knives are available with either a Karambit or Clip Point blade style.

Thin, flat, and super light (a little over 3 ounces including the secure-ex sheath!) they are easy to conceal and very comfortable to wear.

Their most notable and eye-catching feature, however, is their double ring handle design. Slip your index finger and your pinky finger through the integral steel rings and close your fist for a comfortable and secure grip.

Technical Specifications

- 1) Weight: 2.5oz
- 2) Blade Thickness: 2.3mm
- 3) Blade Length: 3"
- 4) Blade Steel: Japanese AUS8A
- 5) Handle Length/Material: 4-5/8" Griv-Ex™
- 6) Overall Length: 7-5/8"
- 7) Additional Features: Secure-Ex® Sheath
- 8) Knife Type: Fixed
- 9) Blade Length Range: 3-5 in
- 10) Steel Family: AUS
- 11) Blade Shape: Karambit
- 12) Product Family: Double Agent

DOUBLE AGENT® SERIES

Cold Steel's Double Agent™ neck knives possess a significant set of advantages worth noting. Designed by Zach Whitson, with either a Karambit or Clip Point blade style, they're thin, flat, and super light (a little over 3 ounces including sheath). This makes them easy to conceal and very comfortable to wear. Their most audacious and notable feature, however, is their double ring handle design. Slip an index finger through the front ring nearest the blade and your pinky finger through the rear ring and close your fist to obtain a forward grip and vice versa for a reverse grip.

It doesn't matter how hard you cut, chop, hack, hammer or thrust with the Double Agent™. Its twin rings will always prevent your hand from sliding forward on the razor sharp edge and will likewise resist the effects of centrifugal force or the efforts of an adversary to wrest the Double Agent™ from your grasp.

- 6) Sheath: Secure-Ex™ Sheath
- 7) Weight: 5.6 oz.

PEACE KEEPERS™

Are you tired of looking at those expensive, double edged knives that are so dull out of the box that they won't cut butter? Or that well known American model that's so brittle it can break if dropped in the sink? Well there is an alternative. The Peace Keepers™ — Cold Steel's® double edged knives that perform like nothing you've seen before.

Unlike most boot knives and daggers, the Peace Keeper's™ spear point offers considerable resistance to bending or breaking.

Available in Carbon V® for maximum strength or 420 Sub Zero Quench Stainless for lower maintenance, and treated with Cold Steel's® custom heat treatment, the Peace Keepers™ offer the utmost in strength, toughness, and superior edge retention.

1.24) Gurkha Kukri, 12” SK-5 Steel

The Kukri blade, with its markedly downward curved blade, has long been identified with the Gurkha Warriors of Nepal, the ferocious mercenaries who have who have wielded this blade for over 150 years in the service of the British Empire.

The Cold Steel Gurkha Kukri was inspired by Cold Steel President, Lynn C. Thompson who designed a longer, narrower point for the Gurkha Kukri with more distal tapering to the spine. This resulted in a thinner, sharper point which can be deeply driven into thick, tough targets with minimal effort.

SK-5 is the Japanese equivalent of American 1080, a High Carbon Steel with a hardness near RcH 65.

The masterfully designed Kraton handle was added to maximize the blade's fierce potential. Perfectly contoured and deeply checkered, it offers a superb non-slip grip and cushions the hand from the shock of the hardest blow.

The Gurkha Kukri is supplied with a Secure-Ex® sheath to protect the blade and allow you to wear it safely and securely on your side always ready to defend you and your loved ones.

Technical Specifications

- 1) Blade Steel: SK-5 HC Stainless Steel
- 2) Finish: Satin Finish (Black Epoxy Powder Coat Finish for mod. 39LGK)
- 3) Blade Thickness: 6.8 mm
- 4) Blade Length: 305 mm

THE GURKHA KUKRI IS OFFICIALLY ENDORSED BY THE AMERICAN BANDO ASSOCIATION. IT IS MARKED WITH THE ASSOCIATION'S DISTINCTIVE SYMBOL.

GURKHA KUKRI

LTC KUKRI

GURKHA KUKRI

TAKING ADVANTAGE OF ITS DOWNWARD CURVING BLADE AND LONG, "V" SHAPED CROSS SECTION, THE GURKHA KUKRI PLACES ITS EDGE AT AN ANGLE TO A TARGET, CREATING A POWERFUL SHEARING EFFECT.

THE HEAVIEST KUKRI ON THE MARKET, THE BLADE IS ALMOST AN INCH WIDER NEAR THE TIP THAN IT IS AT THE HANDLE, WHICH SHIFTS THE KNIFE'S BALANCE POINT FORWARD. THIS MAKES IT POSSIBLE FOR A SUBSTANTIAL BLOW TO BE STRUCK WITH MINIMAL EFFORT, USING INERTIA ALONE TO COMPLETE THE CUT.

LTC KUKRI

THE CURVE OF OUR LTC KUKRI'S BLADE IS VERY IMPORTANT BECAUSE NO MATTER WHAT PART OF THE BLADE MAKES CONTACT WITH A TARGET, THE EDGE IS ALWAYS PRESENTED AT AN ANGLE. THIS CREATES A SHEARING MOTION, SO THAT THE EDGE SLICES THROUGH THE TARGET AS THE WEIGHT OF THE BLADE DRIVES IT DEEPER. WITH ITS THIN CROSS SECTION IT WILL EASILY CUT WOOD, BRUSH OR OTHER SOFT OBJECTS.

FROM 'SOLID PROOF': THE SPINE OF THE GURKHA KUKRI SHATTERS A CONCRETE CINDER BLOCK.

The Greek Kopis and The Roman Machaira were both possible inspirations for the Kukri. These ancient, forward curved blades were known for their tremendous chopping cuts. Cold Steel® takes great pride in being able to offer our versions of these historic blades.

KUKRI SERIES

Perhaps the most versatile of our Kukri Series, the Mini Gorkha Light is an incredible combination of strength and utility. Its distinctively curved blade of Carbon V™ steel gives it the chopping power of its larger siblings, but at only 13.9 ounces it's a pleasure to carry. The Mini Gorkha Light's Kraton® handle can be cradled in the palm for maximum control in dispensing camp chores or hacking your way through thick brush. The blade is black epoxy powder coated and fits snugly into its black leather sheath.

MINI GORKHA LIGHT

Endorsed by The American Bando Association

The Gorkha Kukris are officially endorsed by the American Bando Association. They are marked with the association's distinctive symbol.

GURKHA KUKRI

Endorsed by The American Bando Association

The Gorkha Kukri will out-chop any factory or handmade knives, including swords twice its size — even expensive, hand forged Japanese Katanas.

Taking advantage of its downward curving blade and long, "V" shaped cross section, the Gorkha Kukri places its edge at an angle to a target, creating a powerful shearing effect.

The heaviest Kukri on the market, the blade is almost an inch wider near the tip than it is at the handle, which shifts the knife's balance point forward. This makes it possible for a substantial blow to be struck with minimal effort, using inertia alone to complete the cut.

GURKHA LIGHT

Endorsed by The American Bando Association

For those who prefer a lighter Kukri, we offer our Gorkha Light. At 16 ounces and sporting a 1/2" thick saber ground blade, it is a lighter rendition of our Gorkha Kukri.

LTC KUKRI

The curve of our LTC Kukri's blade is very important because no matter what part of the blade makes contact with a target, the edge is always presented at an angle. This creates a shearing motion, so that the edge slices through the target as the weight of the blade drives it deeper.

Specifications: Kukri Series

LAREDO BOWIE

AWESOME IS THE ONLY ADJECTIVE THAT EVEN BEGINS TO DESCRIBE OUR LAREDO BOWIE. IN FACT, IT REALLY HAS TO BE SEEN TO BE APPRECIATED, SINCE MERE WORDS JUST DON'T DO IT JUSTICE. IT FEATURES A LONG, HEAVY BLADE MADE FROM OUR EXCLUSIVE CARBON V® STEEL. IT IS EXPERTLY HEAT TREATED (UTILIZING SEVEN TEMPERING OPERATIONS), AND FLAT GROUND TO PRODUCE INCREDIBLE CUTTING POWER AND PERFECT BALANCE. AND, AS AN ADDED BONUS, IT IS GIVEN AN ABSOLUTELY FEROCIOUS CUTTING EDGE THAT TERMINATES IN A DAGGER SHARP POINT.

TO FURTHER ENHANCE ITS VERSATILITY AND EFFICIENCY AS A WEAPON IT SPORTS A 4 1/2" LONG SHARPENED CLIP POINT THAT HELPS FACILITATE THE DEADLY BACK CUT AS WELL AS A WIDE VARIETY OF MORE CONVENTIONAL CUTS AND STABBING ATTACKS.

THE RICH, FAUX COCOBOLO HANDLE IS AS TOUGH AS IT IS BEAUTIFUL. IT IS SPECIALLY CONTOURED TO FIT THE HAND LIKE A GLOVE AND TO PROVIDE A POSITIVE GRIP WHEN CUTTING, CHOPPING OR THRUSTING.

TO COMPLEMENT THE LAREDO'S INCREDIBLY SHARP BLADE, AND SUPERB HANDLE WE HAVE ARDUOUSLY FORGED A UNIQUE GUARD AND INTEGRAL BOLSTER OUT OF A SINGLE PIECE OF BRASS. BOTH BOLSTER AND GUARD ARE HANDSOMELY DETAILED AND FINISHED WITH A LUSTROUS MIRROR POLISH.

TO KEEP YOUR LAREDO BOWIE SAFELY AT YOUR SIDE AND READY FOR ACTION, WE HAVE PROVIDED A TRADITIONALLY STYLED BROWN LEATHER SCABBARD THAT FEATURES HEAVY STITCHING, BRASS RIVETS, THICK LEATHER, AND A CONVENIENT BRASS BELT PEG SO YOU CAN SAFELY SLIP THE SHEATH UNDER YOUR BELT.

COMBAT CLASSICS

MAR TEMPERED 0-1 HIGH CARBON STEEL

These time-tested knives have been in our line-up for many years, and remain strong fan favorites.

Popular with Military personnel and civilians alike, they are ideal for just about any mission. Made from 0-1 High Carbon Steel, they are precision ground, heat treated and Mar Tempered in our state of the art factory to rival the strength, toughness, and edge retention of our famous Japanese swords!

1.26) Marauder, 8 1/4" (*) 2013-2020, 2021

Honoring the name of Merrill's Marauders - also known as Code name "Galahad", the United States renowned assault unit within the South East Asian Theater of conflict - our Marauder Bowie is rugged, relentless and reliable.

It features an extra broad, razor sharp blade, with a continuously curved edge, deep wide blade bevels and formidable clip point.

During our intensive and torturous performance testing of this new Bowie our company President simply uttered one word: "Beastly".

Suitable for many military, survival and hunting scenarios, the Marauder is equipped with a versatile Secure-Ex sheath allowing the knife to be fastened comfortably and securely on a belt or pack, or LBV.

Technical Specifications

- 1) Weight: 12.4oz
- 2) Blade Thickness: 4.7mm
- 3) Blade Length: 9"
- 4) Blade Steel: Japanese AUS8A Stainless
- 5) Handle Length/Material: 5-1/8" Kray-Ex™
- 6) Overall Length: 14-1/8"
- 7) Additional Features: Secure-Ex® Sheath Knife
- 8) Type: Fixed
- 9) Blade Length Range: 5+ in
- 10) Steel Family: AUS
- 11) Blade Shape: Clip Point

...

SUB HILT FIXED BLADE SERIES

These sub hilt knives offer all the advantages and performance of a custom knife with the additional advantage of being low in cost. The blades are made of Japanese AUS 8A stainless steel, and are given a state of the art heat treatment that includes double tempering, assuring that they're unsurpassed in strength and toughness.

The grip on these blades is a model of efficiency and economy. The handle, guard and sub hilt are injection molded in one integral piece out of Kray-Ex™. This reduces cost, yet delivers the durability, security, and control a sub hilt is famous for. And, as an added bonus, renders the handles impervious to moisture or inclement weather.

OSS & OSI

The OSS, double edge model, is primarily best suited to a thrusting attack, however, because its twin edges are honed razor sharp, it's capable of delivering a lightning quick slash in virtually any direction.

The OSI is the single edged version of our OSS. Hollow ground to a thin, ultra keen edge it's an awesome "sticker" and will cut and slash with the best of them. Extensively field tested by our President, Lynn C. Thompson, it has field dressed, skinned, and "broken up" dozens and dozens of animals from wild boar to buffalo and proved to be outstandingly efficient field knife. It's also ideal for use in countries or localities that prohibit or restrict double edged knives.

BOAR HUNTER®

Nothing's more primal than hunting wild boar with nothing more than a knife. It's the element of hazard that makes it a worthwhile experience. One catch dog falters, or loses his grip and you're at the mercy of some sharp, angry tusks.

The Boar Hunter® comes with an extra wide Celtic style blade, a long sloping point and a superbly hollow ground edge. It supplies the decisive piercing power you'll need to drop the biggest, meanest boar. Complete with an ambidextrous Secure-Ex® sheath that will accommodate just about any belt, the Boar Hunter® is a lightweight, life saver you'll want at your side on your next hunt.

MARAUDER™

Inspired by the formidable combat knives of World War II and honoring the name of Merrill's Marauders — also known as Code name 'Galahad', the United States renowned long range, deep penetration assault unit within the South East Asian theater of conflict — our Marauder Bowie is rugged, relentless and reliable. A true battle ready Bowie.

Its huge, extra broad, razor sharp Japanese AUS 8A blade, with its continuously curved cutting edge, deep wide blade bevels and formidable clip will cut, hack, shear, chop, slice and pierce with equal ease. During our intensive and torturous performance testing of this new Bowie our company President simply uttered one word: "Beastly".

Its sturdy and versatile Secure-Ex™ sheath allows the knife to be fastened comfortably and securely on a belt or pack, or LBV.

1.27) Steel Tiger, 5", S. Likarich Design

The Steel Tiger is a thoroughly modern tactical interpretation of the Indonesian Karambit.

A design collaboration between Lynn C. Thompson and the late custom knife maker Steven Likarich, the Steel Tiger was designed to possess all the best features of this iconic hooked blade and to integrate them seamlessly with modern materials and styling.

The Steel Tiger's deeply curved and needle sharp AUS 8A stainless steel blade is vacuum heat-treated and sub-zero quenched, taper ground and given a stone wash finish for maximum strength, cutting power, edge retention and performance.

The durable Griv-Ex core handle fully encapsulates the tang, emerging to create the bolster, thumb-shelf and distinctive finger ring. This core is then injection over-molded with premium Kray-Ex™, creating a superb, non-slip grip that won't let you down even in when your hands are cold or wet.

For safety and convenience the Steel Tiger comes with a Military style Secure-Ex sheath that you can lash to your gear or retain on your person via the removable boot/belt clip.

Technical Specifications

- 1) Weight: 5oz
- 2) Blade Thickness: 5mm
- 3) Blade Length: 4-3/4"
- 4) Blade Steel: Japanese AUS8A Stainless w/ Stonewashed Finish
- 5) Handle Length/Material: 5" Griv-Ex™ with over-molded Kray-Ex™
- 6) Overall Length: 8-3/4"
- 7) Additional Features: Secure-Ex® Sheath
- 8) Knife Type: Fixed Blade
- 9) Length Range: 3-5 in
- 10) Steel Family: AUS
- 11) Blade Shape: Karambit

STEEL TIGER®

NEW VG-1 STAINLESS BLADE

Our Steel Tiger® is a thoroughly modern tactical interpretation of an ancient Indonesian Karambit.

A design collaboration between Lynn C. Thompson and the late custom knife maker Steven Likarich, the Steel Tiger® was designed to possess all the best features of this iconic hooked blade and to integrate them seamlessly with modern materials and styling.

The Steel Tiger's broad, deeply curved and needle sharp blade simply has to be seen and felt to be believed. The VG-1 Stainless Steel blade is vacuum heat-treated and sub-zero quenched, taper ground and highly polished for maximum strength, cutting power, edge retention and performance.

The tough and durable Grit-Ex® core handle fully encapsulates the tang, emerging to create the bolster, thumb-shelf and distinctive finger ring. This Grit-Ex® core is then injection over-molded with premium Kray-Ex™ polymer, creating a superb, non-slip grip that won't let you down even in when your hands are cold or wet.

For safety, convenience and lightning quick access, the Steel Tiger® comes with a Military style Secure-Ex® sheath that you can lash to your gear or retain on your person via the removable boot/belt clip.

STEVEN LIKARICH

STEEL TIGER®

Cold Steel has always contended that the Karambit is a specialized style of knife with unique but limited uses. It is also, however, quite popular. So, in response to the many requests from our customers, and with the help of custom knife maker, Steven L. Lancia, we proudly introduce the Steel Tiger®, our interpretation of this ancient Indonesian knife.

It possesses all the best features of the classic Karambit and unites them with modern styling and materials, and, best of all, we've kept it very affordable.

The broadly curved Japanese AUS 8A stainless blade is beautifully polished, taper ground, and vacuum heat-treated and sub zero quenched for maximum strength, cutting power and edge retention.

But it's the grip that really distinguishes it from the competition. Designed for comfort, strength and ease of use, it features a tough Grivory® core that encapsulates the tang, emerging as the bolster/thumbshelf and distinctive finger ring. This core is then overmolded with Kraton®, which yields more to hand pressure than Grivory, and in turn, creates a superb, non-slip grip.

For safety, convenience and quick access, the Steel Tiger® comes with a sturdy Secure-Ex® sheath that you can lash to your gear or retain on your person via the removable boot/belt clip.

SPECIFICATIONS:
 Weight: 5.4 oz.
 Blade: 5"
 Tang: Full
 Overall: 9 3/4"

COLD STEEL® 35

[Back to Home](#)

1.28) Mini Tac Bowie (Plain Edge)

«Шейники» или «нашейные ножи» получили довольно большое распространение. Их используют в качестве ножа скрытого ношения для самообороны, в качестве запасного ножа, утилитарного ножа с легким доступом, или «ненавязчивого» и легкого EDC ножа. В общем возможности применения различны и это так же добавляет им популярности.

Серия Mini Tac это один из «долгожителей компании». Ножи этой линейки выпускаются довольно давно, модели выпускались с разными формами клинков, с несколько разными габаритами, из разных сталей... менялось даже место производства. Неизменными остаются лишь несколько моментов, которые и обеспечили популярность серии.

Момент первый - довольно широкий клинок (особенно если брать этот тип ножей), продуманная геометрия и относительно небольшая толщина, как следствие хороший рез и удобство при проведении очень широкого спектра работ. За надежность так же можно не волноваться (тем более, если мы имеем дело с ножами от Cold Steel) - конструкция ножа Full Tang .

Момент второй - действительно очень удобная и «травмобезопасная» (что для этой категории ножей все же не «есть правило», много моментов обычно «приносится в жертву» компактности) рукоять. Это было достигнуто хорошо

рассчитанной общей формой и наличием интересного варианта гарды, которая, при «обычном» хвате, располагается между указательным и средним пальцами. Что обеспечивает безопасности и надежное удержание ножа при движениях как «от себя», так и «на себя». Накладки рукояти, изготовленные из материала Griv-Ex™, так же имеют ярко выраженную текстуру, для лучшего сцепления с ладонью.

Представленная в объявлении модель является новинкой 2018 года.

Основных отличий от предшественников два. Это форма клинка - Bowie и сталь на клинке - 8Cr13MoV. Множество компаний выпускают свои модели из этой стали, по праву считая её хорошо сбалансированной по сочетанию своих эксплуатационных характеристик к цене. В 2018 году компания Колд Стил решила добавить и в свой ассортимент ножи из этой стали.

Характеристики:

- 1) Длина клинка: 92,08 мм.
- 2) Общая длина: 174,63 мм.
- 3) Толщина клинка: 2,5 мм.
- 4) Материал клинка : 8Cr13MoV Bead Blasted finish.
- 5) Материал накладок рукояти : long G-10 Styled Griv-Ex™.
- 6) Ножны : Secure-Ex® Neck Sheath with Bead Chain Lanyard.
- 7) Вес (без ножен): 80 г.
- 8) Комплект поставки: Нож, ножны, цепочка для ношения на шее.
- 9) Упаковка: Фирменная коробка.
- 10) Артикул: 49HCF.
- 11) Производитель: Cold Steel .
- 12) Страна поставщик: США.
- 13) Страна изготовления: Китай.

Mini Tac Series

Cold Steel's Mini Tac Neck Knives are so slim and lightweight they can be comfortably worn practically 24 hours a day!

With their rugged Secure-Ex™ sheaths, specially designed to snugly retain the knife while allowing a speedy draw, they can perform as a handy utility or camp blade, every day carry knife or rescue tool. Each Mini Tac has thin high-quality textured Griv-Ex handle scales. This feature allows them to lie flat and close against the body while still providing a positive gripping surface. When these scales are combined with integral sub hilt they give the fingers of the hand incredible purchase and facilitate a remarkably secure grip that resists rolling or twisting.

Mini Tac Tanto

The Mini Tac Tanto offers a remarkably wide, stiff blade and a very sturdy reinforced point, making it ideal for piercing even tough, hard objects. As an added bonus, its width allows for a generous hollow ground blade bevel and an extra keen edge, so it can cut almost as well as it pierces.

Mini Tac Skinner

Ideal for cutting and skinning strokes. The Mini Tac Skinner has been extensively field-tested by our R&D team all over the world, and has proven to be more than capable of processing even the largest game and slicing even the thickest hides.

NEW Mini Tac Bowie

A welcome addition to our popular Mini Tac series, the Andrew Demko designed Mini Tac Bowie offers the well-known versatility of a sharp, sturdy clip point, making it ideal for use in the field or for everyday carry. Supplied with a Secure-Ex™ sheath and steel bead lanyard, its sure to give you many years of service.

1.29) Recon Tanto SK-5, 7" 2020

Over the last 34 years, Cold Steel has succeeded in establishing the Tanto as a superior blade for combative application.

Our pioneering research, development and refinement of this blade shape has proven the value of the "American Tanto" style reinforced point beyond question.

Our Recon Tanto continues to redefine the standard for combat knives around the globe. Having seen active military application in numerous conflicts over the last 20 years, it is well on its way to becoming the preferred fixed blade for special military units and even SWAT teams on our own soil.

Experience the extraordinary quality - test the distinctive razor sharp edge for yourself and you will see why the Recon Tanto is a knife you can't afford to be without!

Technical Specifications

- 1) Weight: 9oz
- 2) Blade Thickness: 5mm
- 3) Blade Length: 7"
- 4) Blade Steel: SK-5 w/ Black Tuff-Ex™ Finish
- 5) Handle Length/Material: 4-3/4" Kray-Ex™
- 6) Overall Length: 11-3/4"
- 7) Additional Features: Secure-Ex® Sheath
- 8) Knife Type: Fixed Blade
- 9) Length Range: 5+ in
- 10) Steel Family: High Carbon Steels
- 11) Blade Shape: Tanto

Survival/Rescue operations demand a versatile knife able to withstand the most extreme abuse. The SRK® (Survival Rescue Knife) was designed with this in mind. No expense was spared in steel, heat treatment, and construction. The blade is finished with a rich black epoxy powder coat which helps to protect the Carbon V® steel from the elements. At $\frac{3}{16}$ of an inch thick, the SRK® offers the sturdiest possible point and edge configuration, without sacrificing sharpness.

The SRK®'s handle sports a single quillion finger guard and a deeply checkered Kraton® grip.

Specifications:

Weight: 8.2 oz. Blade: 6" Overall: 10 $\frac{1}{2}$ "

Sheath:

Concealex™

Our superb Japanese Tantos are still unsurpassed for fit and finish, but financially they are beyond the reach of many knife lovers. Now we've combined classic Tanto styling, the strength of Carbon V®, and a comfortable, western-style Kraton® handle in a very affordable package. The Recon Tanto is redefining the standard for combat knives. It is fast becoming the preferred fixed blade for SWAT teams and special military units.

Specifications:

Weight: 9 oz. Thick: $\frac{2}{10}$ "

Blade: 7" Overall: 11 $\frac{1}{2}$ "

Black Epoxy Powder Coat finish.

Sheath:

Concealex™

Tired of those expensive, double edged knives that are so dull out of the box that they won't cut butter? Or the well known American model that's so brittle it can break if dropped in the sink?

Unlike most boot knives and daggers, the Peace Keepers™ double edged spear points offer considerable resistance to bending or breaking and they are treated with Cold Steel's® custom heat treatment, so they offer the utmost in strength, toughness, and superior edge retention.

TACTICAL FIELD KNIVES 19— COLD STEEL®

[Back to Home](#)

1.30) Night Force (***)

Its Bowie style blade is extra wide and features a false edge that terminates in a sharp point.

This configuration has proven to be ideal for a performance knife as it will pierce or shear through just about any target medium like it was going through butter. The blade has a black Teflon finish to minimize light reflection and minimize rust and, like other Cold Steel knives, it is honed to razor sharpness so it will bite deep with the lightest stroke.

Equal attention to detail has been paid to the Zytel handle of the Night Force. It is injection molded in two parts. These parts, or halves, are then reinforced by a stainless steel liner and then bolted together. The result is a stiff, rigid handle that is extremely lightweight yet practically unbreakable.

The Night Force folders feature a leafspring lock. Extensive testing has proved this lock will reliably hold 100 lbs. or more without catastrophic failure, and it will rival any other lock mechanism on the market in terms of safety.

Finally, to keep your Night Force folder handy and ready to use at a moment's notice, there are thumb studs on both sides of the blade for one-handed opening, and an unobtrusive pocket clip on the right side of the handle.

Technical Specifications

- 1) Blade Length: 4"
- 2) Blade Thickness: 0.140"
- 3) Overall Length: 9"
- 4) Blade Material: 440A Sub Zero Quenched Steel Black Teflon Coated
- 5) Weight: 5oz.

Our new Black Talon™ will rip, cut, or slash through just about any material that's vulnerable to a razor sharp edge. Its sinuously curved blade cuts coming or going and terminates in a talon shaped, needle sharp tip that's resistant to bending or breaking.

Made of 440A stainless steel with a sub zero quench for toughness and edge retention, and hollow ground to a thin edge, it will "bite" at the slightest intention.

The intelligently designed handle is made of two injection molded Zytel® parts or "halves" bolted to thick stainless steel liners. It's a comfortable, non-slip grip, that's lightweight and virtually unbreakable.

To protect fingers from the Black Talon's™ sharp cutting edge, we have utilized our state of the art rocker lock. This lock features all of our latest refinements and, in our tests, rivaled, if not exceeded the strength of any other locking mechanism on the market.

For instant access, a uniquely shaped thumb hole makes one handed opening a snap, and, like our other folders, it has a strong, yet compact pocket clip for easy, effortless portability.

Specifications: Black Talon (#608T)

Blade: 4" Handle: 5 11/32" Overall: 9 11/32"

Thick: 5/32" (4mm) Weight: 5.7oz.

440A Sub Zero Quenched. Stainless steel blade with Zytel® handles and black stainless steel pocket clip.

The Night Force's Bowie style blade is extra wide and features a false edge that terminates in a sharp point. This configuration has proven ideal for a performance knife as it will pierce or shear through just about any target medium like it was going through butter.

The blade has a black Teflon® finish to minimize light reflection and rust. Like our other Cold Steel® knives, it is honed to razor sharpness so it will bite deep with the lightest stroke.

The handsome Zytel® handle mirrors the two-part construction technique used in our Black Talon,™ and features a unique leafspring lock of our own design.

Finally, to keep your Night Force™ folder

handy and ready to use at a moment's notice, there are thumb studs on both sides of the blade for one handed opening, and an unobtrusive pocket clip on the right side of the handle.

Specifications: Night Force: Serrated (#58LCS) Plain (#58LC)

Blade: 4" Teflon® coated Overall: 9" Thick: 9/64" (3.5mm)

Weight: 5.1oz. Steel: 440A Sub Zero Quench

Zytel® handle and black stainless steel pocket clip.

BLACK TALON™

NIGHT FORCE™

FOLDERS

1.31) Black Talon (***)

...

BLACK TALON™

WHEN YOU PURCHASE ONE OF OUR NEW BLACK TALON™ TACTICAL FOLDERS THERE'S A PRIZE YOU'LL START HEARING MORE AND MORE "MAN, THAT'S ONE MEAN LOOKING KNIFE!"

THE BLACK TALON™ IS INDEED AN AWE INSPIRING, FEROCIOUS LOOKING KNIFE. IT'S EFFICIENT BOTH COMING AND GOING AND WILL RIP, CUT, OR BASH THROUGH JUST ABOUT ANY OBSTACLE OR MATERIAL YOU PUT IN ITS PATH. THIS IS BECAUSE OF ITS NEEDLE SHARP, TALON-LIKE POINT, AND ITS SINUOUSLY CURVED BLADE. THE BLADE IS MADE FROM OUR OWN EXCLUSIVE SAN MAI III® STAINLESS STEEL SO YOU KNOW IT WILL HOLD AN EDGE FOR A LONG TIME AND WILL BARELY REQUIRE RE-SHARPENING.

THE ELEGANTLY SIMPLE GRIP OF THIS ALL-OUT CUTTING BLADE IS STRONG AND STURDY. IT FEATURES A ROBUST TITANIUM FRAME, WHICH SUPPORTS THE FORGED TITANIUM BOLSTERS AND HIGHLY TEXTURED G-10 SCALES. THE WELL BUILT, YET HIGHLY REFINED, TITANIUM LEAF SPRING LOCK WILL PROTECT YOUR FINGERS FROM THE BLACK TALON'S™ RAZOR SHARP EDGE. THIS LOCK, IN OUR TESTS, HAS PROVED ITSELF PEELESS WHEN IT COMES TO WITHSTANDING GREAT SHOCK AND STRESS.

FOR INSTANT ACCESS, THE BLACK TALON™ HAS A UNIQUELY SHAPED THUMB HOLE CUT INTO THE BLADE MAKING IT A SNAP TO OPEN WITH EITHER HAND. AND FOR CONVENIENCE AND SECURITY THERE IS A COMPACT POCKET CLIP AND A STEEL LINED LANYARD HOLE. THE CLIP IS REMOVABLE, SO IT CAN ACCOMMODATE LEFT AND RIGHT-HANDED USERS ALIKE.

From "Solid Proof": The Black Talon holds 100 lbs!

SPECIFICATIONS:
Black Talon™ (#6087)

Blade: 4"
Overall: 9 1/4"
Thick: 4mm
Weight: 6.6 oz.
Steel: San Mai III®

BLACK SABLE™

YOUR FRIENDS MAY TURN A PROFOUND SHADE OF GREEN—WITH ENVY THAT IS—THE FIRST TIME YOU SNAP OPEN YOUR NEW BLACK SABLE™. AND THEY START EYING THAT MAGNIFICENT MIRROR POLISHED BLADE. OF COURSE, THEY'LL PLEAD WITH YOU TO HAND IT OVER FOR CLOSER INSPECTION AND OF COURSE THEY'LL IMMEDIATELY WANT TO KNOW WHERE THEY CAN GET ONE OF THEIR OWN. WE ALL LIKE TO BE IN THE SPOTLIGHT NOW AND THEN AND WHEN YOU'RE THE PROUD OWNER OF A COLD STEEL® BLACK SABLE™, NOT ONLY WILL YOU HAVE A FINELY CRAFTED FOLDER, YOU'LL ALSO HAVE BRAGGING RIGHTS THAT WILL LAST FOR YEARS.

CONSIDER THE BLADE—MADE OF HOLLOW GRIND SAN MAI III® STAINLESS STEEL AND HAND POLISHED TO A MIRROR SHINE—EVEN THE MOST JADEY EYES WILL FIND IT FASCINATING. BUT A COLD STEEL® BLADE IS MORE THAN JUST HOMAGE TO STYLE, THIS BLADE HAS ENOUGH SUBSTANCE TO BE RIGHTFULLY EFFECTIVE. EVERY FEATURE FROM ITS CURVED, UPSWEEP SHAPE TO ITS ACUTE, REINFORCED POINT HAS BEEN JUDICIOUSLY CHOSEN TO MAXIMIZE CUTTING AND REACHING POWER. JUST RUNNING YOUR THUMB OVER ITS RAZOR SHARP EDGE WILL TELL YOU THIS IS SOMETHING TO BE RECKONED WITH.

BUT NO FOLDER CAN STAND ON THE MERITS OF ITS BLADE ALONE. THAT'S WHY COLD STEEL® SPARED NO EXPENSE OR EFFORT IN MAKING SURE EVERY OTHER COMPONENT CORRESPONDS TO THE BLADE IN QUALITY AND PERFORMANCE. THE DISTINCTIVELY SHAPED, PISTOL GRIP HANDLE FEATURES A TITANIUM FRAME OVERLAIN WITH HIGHLY POLISHED BLACK MICARTA SCALES AND FORGED TITANIUM BOLSTERS THAT HAVE BEEN MATED TOGETHER AND BOLTED INSEPARABLY TO THE FRAME WITH THE LATEST HIGH TECH FASTENERS.

TO PROTECT THE FINGERS FROM THE UNINTENTIONAL CLOSURE OF THE BLADE, THE BLACK SABLE™ HAS BEEN FITTED WITH COLD STEEL'S® STATE OF THE ART "ROCK-ER" LOCK. A HIGHLY REFINED LOCKING MECHANISM, PERFECTED BY COLD STEEL® OVER THE LAST EIGHTEEN YEARS, THAT RELIES ON EXTRA STRONG SPRINGS, SUPER CLOSE TOLERANCES AND OTHER SECRET REFINEMENTS TO MAKE IT EQUAL, IF NOT SUPERIOR, IN STRENGTH, TO ANY OTHER LOCK ON THE MARKET.

FOR CARRYING AND OPERATING CONVENIENCE, THE BLACK SABLE™ COMES WITH DUAL, MIRROR POLISHED POCKET CLIPS (FOR AMBIDEXTROUS OPERATION), AND DOUBLE THUMB STUDS FOR RAPID DEPLOYMENT.

From "Solid Proof": The Black Sable holds 100 lbs!

SPECIFICATIONS:
Black Sable™ (#6085)

Blade: 4"
Overall: 9 7/8"
Thick: 3mm

1.33) GI Tanto, 7", 2015

Our G.I. Tanto is a no-nonsense tactical knife that comes with a legion of practical uses.

The GI Tanto's broad blade, integral quillon guard, and Polypropylene handle scales exemplify a tactical knife stripped down to its bare essentials. Made from spring tempered 1055 carbon steel and protected by a rust resistant finish, it's rugged, hard-wearing and dependable.

Popular with sport throwers, the GI Tanto is perfectly balanced and capable of being thrown by the blade or handle. In a survival or self-defense situation, it can be quickly and easily converted into a spear too! Just remove the handle scales and lash the blade securely to a suitable wooden shaft!

Best of all, it's a great value blade inexpensive enough to buy duplicates to keep as back-up or bug-out bag knives, or even just to throw for fun on a sunny day. A stalwart and reliable knife that you can depend upon in a pinch.

Technical Specifications

- 1) Weight: 12oz
- 2) Blade Thickness: 4mm
- 3) Blade Length: 7"
- 4) Blade Steel: 1055 Carbon
- 5) Handle Length / Material: 5" w/Polypropylene Scales
- 6) Overall Length: 12"
- 7) Additional Features: Secure-Ex® Sheath

G.I. TANTO

As its name suggests, our G.I. Tanto is a no-nonsense tactical knife that comes with a legion of practical uses. It may be lean and spare, but it delivers the goods where they count the most! The broad Tanto point blade, integral quillon guard, and Polypropylene handle scales, exemplify a tactical knife stripped down to its bare essentials. It's ground razor sharp out of 1055 carbon steel with a hard spring temper and protected by a black, rust resistant finish so it's ready to take all the abuse you and Mother Nature can dish out.

Heavy, sharp and wonderfully balanced, it's easy to throw by either the blade or handle and it hits with real vigor. In a survival or self-defense situation, it can be quickly and easily converted into a spear or war club. Just remove the handle scales and lash the blade securely to a suitable wooden shaft!

Best of all, it's a great value. Please don't throw away hundreds and hundreds of dollars on similar knives sold by convicted felons and rip off artists posing as elite "military operators". Get the real G.I. Tanto from Cold Steel and get more than your money's worth.

1.34) Gold Lion Katana, 30", Damascus Steel

The Cold Steel Gold Lion Katana represents a Samurais every day carry sword for personal protection, and the defense of his Lord, his family and his home. Significantly lighter than some of our other heavier-duty Katanas, it is not only faster in-hand, but easier and more comfortable to carry when tucked into an Obi and worn all day.

The Katanas Menuki bears the symbol of the Japanese Shisa (Lion Dog) a guardian or protector - a fitting motif for this beautiful lightweight sword.

Measuring just under thirty inches, the Gold Lion Katanas blade is made from expertly hand honed and highly polished Damascus steel, with an Hamaguri grind, peaked Lori Mune spine and undulating clay-tempered Hamon.

The black iron Tsuba, Fuchi and Kashira all have gleaming 24 carat gold leaf accents and the handle features white ray-skin and a black silk cord wrap.

Technical Specifications

- 1) Weight: 28.7oz
- 2) Blade Thickness: 6mm
- 3) Blade Length: 30in

- 4) Blade Steel: Damascus
- 5) Handle Length / Material: 11-1/4in
- 6) Overall Length: 41-1/4in
- 7) Additional Features: Black Lacquered Wood Scabbard. Sam© (Ray Skin)
Handle with Black Braid Cord and Brass Menuki
- 8) Sword Style: Japanese
- 9) Blade Length Range: 20-30 in
- 10) Steel Family: Damascus

GOLD LION SERIES

The Cold Steel Gold Lion Katana represents a Samurai's "every day carry sword" for personal protection, and the defense of his Lord, his family and his home. Significantly lighter than some of our other heavier-duty Katana, it is not only faster in-hand, but easier and more comfortable to carry when tucked into an Obi and worn all day.

The Katana's Menuki bears the symbol of the Japanese Shisa (Lion Dog) a guardian or protector - a fitting motif for this beautiful lightweight sword.

Measuring just under thirty inches, the Gold Lion Katana's blade is made from expertly hand honed and highly polished Damascus steel, with a Hamaguri grind, peaked Iori Mune spine and undulating clay-tempered Hamon.

The black iron Tsuba, Fuchi and Kashira all have gleaming 24 carat gold leaf accents and the handle features white ray-skin and a black silk cord wrap.

The Gold Lion Wakizashi mirrors the materials, fit and finish of its larger brother in every way except size. It's equally light and fast, and with the same high-quality materials, but at a fraction of the size, making it an exquisite companion piece to the Gold Lion Katana, or a beautiful stand-alone blade in its own right.

1.35) Bokken, 30"

Our Japanese Training Swords are closely modeled after our world-famous Warrior series swords. Their wide blades imitate the flowing lines of our Warrior swords, but as they are made from super tough polypropylene, with no sharp edges or points they are perfect for armored sparring, training, conditioning drills and pell work.

Each model also features an intricately detailed imitation cord wrap grip, offering superior control even when wearing heavy gloves.

Our Training Swords offer superior heavy-duty training potential for the modern Martial Artist.

Technical Specifications

- 1) Weight: 19.9oz
- 2) Blade Thickness: 1in
- 3) Blade Length: 30in
- 4) Handle Length / Material: 11-1/2in Polypropylene
- 5) Overall Length: 41-1/2in
- 6) Trainer Style: Sword
- 7) Blade Length Range: 30+ in

1.36) *Kraton* CAT Tanto, Nightshade

Made from Griv-Ex the latest in fiberglass reinforced plastic our FGX Nightshade series knives are UV and heat stabilized to make them incredibly durable. The handles of these unusual knives are made from deeply checkered Kray-Ex that's molded directly onto the blade tangs. This offers a slightly tacky-feeling textured surface that will give you a decisive and secure grip whatever the weather. Our FGX Nightshade blades are unaffected by moisture. They never rust, warp, crack or split even in the most challenging environments.

They are light enough to be tied, tucked, or taped just about anywhere, and, since they are unaffected by all but the most extreme heat and cold, they are a natural choice for concealed storage both inside and outside of your house - from hedges and flowerpots, to the refrigerator or the shower!

Technical Specifications

- 1) Weight: 3.1oz
- 2) Blade Thickness: 8mm
- 3) Blade Length: 6in
- 4) Handle Length / Material: 5-1/2in Griv-Ex with Kray-Ex Grip
- 5) Overall Length: 11-1/2in
- 6) Blade Length Range: 5+ in

The CAT Covert Action Tanto

NOT FOR SALE IN CANADA

Black, silent and totally undetectable! The CAT is a featherweight reproduction of Cold Steel®'s famous Tanto! It shares all the design features that made the original Tanto so popular, including the sure-grip handle shape, the reinforced point and the "skull crushing" pommel. The CAT is made of 43% glass-filled Zytel® nylon, which has been UV and heat stabilized to be impervious to the elements.

With the CAT, you have a super-light, full size knife that you can really get a grip on and generate tremendous penetration. The CAT can be taped, tied or tucked away just about anywhere, and since it's also invisible to metal screening devices, it can easily pass unnoticed through security checks. To complement its covert nature, the CAT is totally "sterile" with no markings to indicate the point of origin.

Just look how far the CAT Tanto can flex in a vise

This CAT Tanto returned to true afterwards.

#92CAT CAT Tanto

Sugg. Retail: \$7.99

This optional heavy duty handsome leather sheath is also available.

The picture, above right, shows the dent in a car door from impact with the skull-crushing pommel of the CAT. As you can see the pommel is completely undamaged! Below, the CAT Tanto is stabbed through multiple layers of heavy cardboard. It has tremendous penetration.

CAT TANTO

The CAT Tanto is a one hundred percent Zytel® reproduction of Cold Steel's® famous original Tanto! It shares all of the design features that made the original Tanto so popular, including the sure-grip handle shape and the reinforced point.

Made from 43% glass-filled Zytel® nylon which has been UV and heat stabilized to be impervious to the elements.

DELTA DART

The Delta Dart is 8 inches long and a half inch in diameter, yet it weighs only seven tenths of an ounce!

Like the CAT Tanto, the Delta Dart is made from extremely hard 43% glass-filled Zytel®. This is the highest glass to nylon ratio available so the point is tougher, lasts much longer and is easily re-sharpened with a nail file.

1.38) Arc-Angel Clip-point – Darrel Ralph Gemini (***)

...

First popularized by the Balisong company in the early 1980's, the Butterfly knife with its revolving handles and super strong lock took the entire nation by storm.

There has been, however, one catch. Since the early 1990's, United States Customs has forbidden the importation of all Butterfly knives under (what can only be assumed to be) their arbitrary interpretation of the Switch Blade Act. This policy has, in turn, severely curtailed the available market supply of these awesome tactical folders.

For years now, Cold Steel® has sat back, silently chaffing under this situation's utter unreasonableness, made all the more dire since we know full well that there are lots of fans of the Butterfly knife out there. Ultimately, there arose the necessity to do something to remedy the dismal state of things as they were, and so we created our own But-

ARC-ANGEL™

terfly knives. Our Arc-Angel™ Butterfly knives are precision made right here in the USA and display the finest craftsmanship. The blades are flat ground out of our famous Carbon V® steel and honed to a razor edge for real cutting power.

The skeletonized handles are CNC machined out of solid Titanium billets (not cast, like cheap knives) for maximum strength without unnecessary weight or bulkiness. Each knife is hand polished and assembled by skilled technicians for flawless opening and closing action that will both delight and amaze you.

Finally to increase the portability of your Arc-Angel™ we have integrated a state of the art pocket clip so you can carry it discretely wherever you go.

Specifications:

1.39) Latin Machete, 18"

...

[Back to Home](#)

1.40) Barong Machete, 18", 2007

The Barong, with its unique leaf shaped blade, is common throughout all of Southeast Asia. Very often it is used for utilitarian purposes to clear jungles or as an agricultural tool, but it is also known as a savagely effective weapon of warfare. We at Cold Steel admire the Barong and are proud to offer it here as a Machete in 12 and 18-inch blade lengths.

The machete has proven to be the ultimate outdoor and survival tool. It will cut, chop, slash, or smash just about anything you can put in front of it. It can be used to kill both fish and game and will also field dress and prepare them for the table as well. And when you look at its meager cost, it's got to be one of the best bargains for the money.

These blades are made out of 1055 Carbon Steel with a tough spring temper and are surfaced with a black, baked-on anti-rust finish. Each Cold Steel® Machete comes with a good utility edge which, with just a little work, can be made hair shaving sharp.

The tough, polypropylene handles of our machetes are designed to provide a comfortable secure grip and they are rugged enough to resist chipping, cracking or breaking so they last practically forever.

Technical Specifications

...

MACHETES

FOR 2007

The machetes on these pages are new introductions for 2007! Like the Machetes shown on

The Sax blade style is centuries old and hails from ancient Northern Europe, or what is now Scandinavia. Like its historical counterpart, it has a wide blade and a straight cutting edge and the characteristic downward sloping point. The Cold Steel Sax Machete is available in 12 and 18-inch blade lengths and comes complete with a Cordura sheath.

The Kopis Machete is based on an ancient short sword design that was held in high esteem by the Greeks, Romans, and Spaniards. This was because its uniquely shaped blade had the weight forward balance that was necessary for cutting and chopping, yet it retained a sharp, useful point for thrusting as well. Our Kopis Machete comes complete with a sturdy Cordura sheath.

This centuries old blade style is very popular in Central and East Africa as well as parts of South America. This is because of its nearly inexhaustible, "all-around" versatility. It cuts, chops, and slashes like the best of them, plus, it possesses a sharp enough point to make it useful for piercing and performing more delicate utility jobs usually left to a smaller knife. It is available in 12 and 18-inch blade lengths and comes complete with a *Gordura* sheath.

1.41) Bowie Blade Bushman

For the money, the Bushman series of survival knives are hard to beat! Unlike the majority of hollow handled knives, there is no joint or seam between the blades and handles, instead the Bushmans blade and handles are cold forged out of a single piece of SK-5 high carbon steel! The resulting knives are expertly heat-treated and tempered to RC54 and, when subjected to our tests, have withstood over two tons of pressure on their blade/handle transition! Every Bushman has been carefully ground to an extra thin edge, and then honed and buffed by hand until razor sharp. Their hollow handles will accept survival supplies or a variety of handle extensions which can maximize reach, leverage or ease of throwing. Available in two blade styles (Standard and Bowie point) both feature curved blades that are ideal for skinning and a multitude of bushcraft chores. Both come complete with a Secure-Ex sheath which houses a high-quality Ferrocerium Fire Steel.

POCKET BUSHMAN

The Pocket Bushman was designed with one clear goal; to create a rugged, dependable folder for camp and utility chores. A knife that could be depended upon for tough outdoor tasks and emergency survival applications, while still being small and handy enough to fit in a pocket or be stowed in a pack.

The Pocket Bushman's sub-zero cryo-quenched 4116 stainless steel blade is incredibly durable, and capable of taking (and holding) a fantastically sharp edge. It's long and wide with a sharp clip-point for maximum practicality and versatility in the field.

For the handle, we used a mono-block construction made famous by the classic French "Douk Douk". There are no liners, handle scales or back spacers. Instead, a single sheet of stainless steel is folded in half to form a housing for the closed blade, as well as supplying the enormous strength and rigidity required to complement our innovative Ram Safe™ lock.

Sheer simplicity, and affordable practicality - the Pocket Bushman is a knife you can depend upon!

ADD

SJAMBOK

In Africa, the Sjambok (Sham-Bawk) is a cattle prod, a whip, a riding crop and a means of self-protection. Unlike most western style whips, the Sjambok is not plaited from thin leather strips. Instead, it is carved whole out of Hippopotamus hide. Its considerable reach, lightning speed and devastating impact have built it quite a reputation as a sure defense against deadly snakes. The Cold Steel® synthetic Sjambok hits just as hard as one that is made out of the traditional Hippo hide. It was designed with input from our friend Peter Mueller. It's 25% heavier than our earlier model and features a much softer, more comfortable, Kraton® handle that's made to resemble braided leather. This bigger, thicker handle, when combined with the heavier, beefier lash allows our new Sjambok to be swung with even greater power and control, making it a must-have whip for city people and country dwellers alike.

SELF DEFENSE WITH THE SJAMBOK
 DVD SET
 (#VDFSK)

SELF DEFENSE WITH THE SJAMBOK

In addition to its use as a cattle prod, whip, and a means of self protection, the African Sjambok is also known as a formidable snake killer. Its considerable reach, lightning speed and devastating impact make child's play of dispatching some of the biggest snakes. And you can imagine how devastatingly effective it is on two legged predators as well. A light blow can raise a serious welt while a heavy stroke can cut through thick clothing as efficiently as a razor, leaving a fearsome yet non-lethal wound.

In this new DVD, entitled Self Defense with the Sjambok, Lynn Thompson, President of Cold Steel® and Chief Instructor of our training division will teach you how to use the Sjambok to defend yourself and your loved ones.

HERE'S JUST A PARTIAL LIST OF THE SUBJECTS COVERED...

- Advantages of the Sjambok as a weapon.
- Training equipment and safety.
- Gripping methods.
- Fighting stances.
- Footwork.
- One and two handed striking methods.
- Pommel strikes.
- Pushing, pulling, and hooking.
- Encircling, trapping, tripping, and uprooting.

- Smashing, choking, and sawing.
- Using footwork to avoid blows.
- Defending your weapon hand, stop hitting, counter slashing, parrying, blocking, using the empty hand.
- Defeating disarm attempts.
- Defeating the charge.
- Defeating the standing grapple.
- Strategy.

2.4) Endura 4

ENDURA® 4

Released in 1990, the original Spyderco Endura and its smaller counterpart, the Delica®, literally redefined the concept of today's folding knife. As the very first lightweight, clip-carry, one-hand-opening folders, they set a new standard. After decades of refinement, the fourth-generation Endura continues to set the standard as one of the best-selling folding knives ever made. In the process, it has also spawned an entire family of variations to meet virtually every user's needs and preferences.

The direct descendants of the original model, Endura 4 Lightweights feature skeletonized stainless steel liners and injection-molded fiberglass-reinforced-nylon (FRN) handles. They come in a full spectrum of colors and a variety of different grinds, edge configurations, and blade steels. Specialized versions include one with an Emerson Opening Feature that automatically opens the blade as the knife is drawn, a blunted red-handled trainer, and hand-dyed Zomo versions with multi-colored handles.

For those who prefer greater strength and heft, the Endura 4 is also available with a satin-finished stainless steel handle and saber-ground blade. All members of the Endura 4 family include a four-position clip, a high-strength back lock mechanism, and Spyderco's Trademark Round Hole, making both carry and operation of these hardworking knives completely ambidextrous.

2.5) Civilian G-10

...

Civilian C12

The Civilian was developed for a prestigious branch of US law enforcement. The reverse "S" blade shape evolved to fulfill the back-up needs of undercover agents with little or no self defense training. This is a very specialized knife with a paper thin tip and is not designed for everyday general utility use.

- Blade steel is hollow-ground VG-10.
- G-10 handle keeps the weight down and provides a non-slip grip.
- Comes with a fully serrated SpyderEdge.
- Black clip situated for a tip down carry.
- Available in limited quantities.

2.6) Matriarch 2 Lightweight

...

Matriarch C12BK

A small lighter weight version, the Matriarch has the same design philosophy as the Civilian. Recommended for law enforcement professionals but not for everyday general utility use.

- Blade steel is hollow-ground VG-10.
- Comes with a fully serrated SpyderEdge.
- Black FRN handle with volcano grip pattern.
- Black ambidextrous clip provides tip up carry.

2.7) Military (*)

MILITARY MODEL C36

Incorporating feedback from military personnel worldwide, this all-around tactical cutting tool accommodates heavy use in an efficient design. The rugged scales are formed of G-10 to optimize temperature, chemical and impact resistance, eliminating the need for liners and contributing to an overall slim profile. A minimal spacer is used between the scales to permit quick cleaning, and a stepped lanyard hole helps keep the back end of the knife rigid. Expanded curves at both the front and rear of the handle prevent slipping during assertive tasks, while machine notching at the thumb rest, finger choil and Linerlock promote positive purchase. Also part of the unique handle design, the Walker Linerlock is recessed into the scales to enhance the thin profile. At the same time, the Linerlock is conspicuous and easily accessible to facilitate operation while wearing gloves and to allow for visual inspection. The modified clip-point blade incorporates a forward belly and flat grind - these together provide for powerful and reliable cutting. The blade is available in the production premiere "powdered metal" CPM 440V, which boasts superior toughness and wear resistance. The knife also includes the Spyderco Trademark Round Hole in the blade (the hole is enlarged slightly in diameter for easy one-hand opening while wearing gloves) and the stainless pocket clip (the clip is mounted around the pivot pin such that the pin is still accessible). Noticeably thinner and more comfortable to carry than most large tactical knives, this efficient piece serves as a dependable tool that the designer would trust to send with his son or daughter into the service.

2.8) Native GIN-1 Steel (*)

Native C41

The Native combines cutting power and uncommon features in a moderate size. The handle will tolerate extreme use and is made of lightweight fiberglass-reinforced nylon resin or sturdy stainless steel (not pictured). The lightweight version incorporates a unique bi-directional pattern on both sides that is designed to help prevent forward or backward slipping. Both ergonomic handle designs maximize control along with four other features: the front lock; the modified stainless steel clip (reversible for right/left carry and mounted as part of the lanyard hole); the substantial finger choil; and the texturing at the base of the blade spine. Each spearpoint-style blade includes a pronounced swedge, and both the blade and swedge are hollow-ground. A handful of working tool, this U.S.A. made CLIPIT is great for everyday use.

2.9) Lum Tanto G-10 Sprint Run 2011 (***) 1998-2000

Bob Lum is respected as the first American custom knifemaker to introduce the Asian tanto-style blade to western knife circles. Bob's legacy as a knifemaker and his passion for Asian-influenced cutlery, combine exotic materials and clean flowing modern lines, melding these together with pointedly tactical and American features.

The Spyderco C46GPGY Bob Lum Tanto is a Sprint Run, limited in number and availability. Its blade is VG-10 stainless steel, tanto-shaped and hollow-ground for amplified cutting capacity. Positioned high on the blade, the Spyderco round opening hole presents a pronounced hump that is flattened on top to position the thumb for controlled cutting.

Skeletonized internal liners run the full length of the light-gray G-10 handle scales providing strength and supporting a Michael Walker LinerLock®.

Bob Lum's reputation as a knifemaker continues after his passing. His knives bring attention to detail and craftsmanship. Combining that talent with Spyderco's reputation for quality makes the Bob Lum Tanto an exceptional folder that is both tactical and practical.

Technical Specifications

- 14) Origin: Japan

Bob Lum C46

Bob Lum was the first custom knifemaker to introduce the tanto-style blade to the United States. This blade style now graces his first collaboration with Spyderco. "Lum" (which means "forest") adorns the blade in Chinese characters. The "hamaguri" or applesed grind adds tip strength, and the flattened area above the opening hole provides a gripping point for the thumb. The angular titanium handle complements the blade design and incorporates a lined lanyard hole, smoothly finished spacers and a Linerlock. A stainless steel pocket clip finishes off this beautiful tactical-style folder and allows for tip-up and tip-down carry, which has superb open-and-close action.

Limited Quantities: Availability based on demand.

TIM WEGNER C48

Tim Wegner combines knifemaking expertise and hunting experience in his first collaboration with Spyderco. The result is an everyday companion that meets the specific needs of the sportsman. Patterned in a drop-point style, the sturdy hollow-ground blade provides excellent edge retention and has just enough skinning curve to be effective for dressing large game. Cross-texturing above the Spyderco Trademark Round Hole allows for accurate thumb placement and precise edge control. The handle is formed of premium G-10 for resistance to slipping and weather conditions. It feels comfortable in all grip positions and incorporates a strong Linerlock. The lanyard hole at the end of the handle offers extra security in deep snow or around water. This lightweight cutting tool will do what is asked of it and more.

2.12) Chinook - James Keating design

...

James A Keating Chinook C63

Recently James A. Keating (a Master at Arms) came to Spyderco with an intriguing knife design in hand. This design entered the Spyderco R&D Department. There it underwent various tweaks and refinements emerging as a new CLIPIT dubbed the C63 Chinook. Keating's design is capable of handling a gamut of strenuous cutting chores. Spyderco uses a lockback with strength beyond industry standards. Originally developed for Martial Blade craft and tactical applications, the Chinook effortlessly transforms into a field knife, filling the varied requirements for a hard-use hunting/camp knife. The upswept modified Bowie-style blade is made of CPM440V steel and is 3 3/4 inches long with substantial belly and breadth for skinning and field dressing. Included is a substantial pocket clip for tip-down carry. Outdoor adventurers and extreme sportspeople take notice.

2.13) ATR At The Ready (***) 2002-2006

...

CROSS A.T.R. (AT THE READY)

The “keep it super simple theory” was our catalyst when engineering the ATR. With fewer moving (wearable) parts and high-tech components it is a perpetual workhorse. Holes in the handle trim weight and flares on opposing ends result in a finger choil and pinky shelf for confident grip in any draw position. Cobra Hood positions the thumb under the hood’s overhang for rapid (by feel) deployment and forms a seat for the thumb during cutting.

Available: Uncoated or with black Titanium
Carbo Nitride Coating.

Yojimbo

C85 The Yojimbo is a folding version of the Master MBC Instructor

[Back to Home](#)

2.16) GPBK Yojimbo (*)

C85 YOJIMBO

Martial artist Michael Janich's triangular-shaped blade holds the sharpened edge in contact with what you're cutting, while the fine tip generates less resistance initiating and making piercing cuts. Running along the spine are slip-resistant thumb serrations. Palm-fitting handle heightens dexterity/control and the tapered tail improves grip retention, doubling as a pressure point or striking tool. Blue or black G-10 handle.

*Limited red handled Yojimbo Trainers with unsharpened blades also available

- **Modified Wharncliffe flat-ground blade**
- **G-10 handle in blue or black**
- **Ambidextrous, tip-up carry**
- **Made in Golden, Colorado**

La hoja triangular del especialista en artes marciales Michael Janich mantiene el filo en contacto con lo que Vd. corta, mientras que la punta fina genera menos resistencia al iniciar el corte y la perforación. Las ranuras del lomo mango aumentan el control y la destreza al encajar en la palma de la mano. El pomo saliente aumenta la retención del agarre, además de su posible uso

adicional como punto de presión o herramienta para golpear. Mango G-10 en colores azul o negro.

*También hay disponible una cantidad limitada de Yojimbo Trainers con mango rojo y sin filo.

- **Hoja Wharncliffe modificada con perfil recto**
- **Mango G-10 azul o negro**
- **Ambidextro. Transporte punta arriba**
- **Fabricado en Golden, Colorado**

2.17) Scorpius (***) 2004-2007

C87 SCORPIUS

The premise that form follows function explains the distinctive appearance of Eric Glesser's urban utility knife the Scorpius. Sized for city carry, its wavy handle ergonomically settles the index and middle fingers with the tail making an effective impact and non-lethal control tool.

- **Hollow-ground blade**
- **David Boye Dent**
- **14mm Spyderco Round Hole**
- **Right-handed, tip-up/tip-down carry**

La premisa básica de que la forma está supeditada a la funcionalidad explica la apariencia de la navaja urbana Scorpius de Eric Glesser. Dimensionada para uso urbano, su mango ondulante acomoda los dedos índice y corazón con el pomo, creando una efectiva herramienta de control de impacto y no letal.

- **Hoja vaceada**
- **Muesca David Boye**
- **Orificio redondo de Spyderco de 14mm**
- **Diestros. Transporte punta arriba/punta abajo**

2.18) Spyderfly Balisong (***) 2004-2007

BOI SPYDERFLY

I don't know why- the spyder swallowed the fly. The SpyderFly infuses traditional Balisong elements with innovative Spyderco features. Balis are about swinging, sometimes called doing the dance. Designer Eric Glesser incorporates Spyderco's Round Hole into the handle sections for coordinated control and smooth swinging. Handle is cast stainless steel, chamfered for pinch-free comfort that is elongated for added swinging and maneuver options. Sharpened on one side only.

- Hollow ground blade
- Center-Line grind for equal weight/ balance on both sides of the blade
- Wire clip attaches to either handle left/right carry, tip up
- Spring loaded latch locks the blade closed

La SpyderFly funde elementos tradicionales Balisong con características innovadoras de Spyderco. El movimiento con una Balisong es balanceo: a veces se le llama "bailar la danza". El diseñador Eric Glesser incorpora el orificio redondo de Spyderco en las secciones del mango para ofrecer un control coordinado y un balanceo suave. El mango es de acero inoxidable fundido, biselado para evitar pellizcos incómodos y alargado para obtener movimientos adicionales. Filo en un solo borde.

- Hoja vaceada
- Espina central para un reparto equilibrado de pesos a ambos lados de la hoja para transporte punta arriba
- El clip metálico se puede colocar en cualquier sección del mango
- El pestillo -accionado por un muelle- bloquea la navaja en posición cerrada

2.19) Tenacious

C122 Tenacious

Being tenacious means holding fast, having persistence and cohesiveness. It means being tough, tireless and consistent. The knife industry seems to be leaning toward manufacturing inexpensive, average-made knives that are dressed up like high performance pieces, retailing under sixty dollars. Identifying and sidestepping these mid-class knives can be vexing to end-line users. Rest assured, we've tenaciously adhered to Spyderco's manufacturing quality standards. G-10 handle resists elements and is ergonomically milled for continuous fatigue-free use. Walker Linerlock® with jimped liner. Lined lanyard, full skeletonized steel liners. Fit, finish and features you'd expect on a hundred dollar folder. Our best dollar value Spyderco and one of our top sellers.

- 4-way Clip: Tip up/down left/right hand
- Screw-together construction
- Phosphor bronze washers
- Skeletonized steel liners
- Enlarged opening hole
- Spine jimping
- Flat-ground blade

3.1) Bali-Song, Titanium (***)

MODEL 42 BALI-SONG FOLDING KNIFE

The best is born of history and tradition or as is the case with the Benchmade Bali-Song®—“reborn”. For us, the best began with the Bali-Song, the butterfly knife awesome in its simplicity, the ultimate example of form following function. ☉ And now we retrace those steps with the new Model 42 with its numerous appreciable improvements. For starters, the Wee-hawk style blade is secured to the handles with torx-head screw pivot-pins, making the possibility of changing out blades a reality (*Benchmade plans to make optional blade styles available later in the year.*), and the pins are heat-treated and larger than previous ones. The handle latch also uses a torx-head pivot-pin attachment as well, so it may be removed if preferred. ☉ Another nice feature are the skeletonized cast Titanium handles which are very tough and of nominal weight for better balance. The handles feature a “latch gate” to prevent the latch from contacting the blade, and they have a more pronounced contour for improved grip. ☉ As for the blade itself, we’ve extended the false edge farther back up the blade as was done on the traditional Weehawk designs. ☉ So if you’re already a Bali-Song fan from way back, you’ll definitely be pleased with the new Model 42. Or if you’re just looking for the ultimate in basic form and simple function—this is it.

MODEL 42 BALI-SONG—BLADE MATERIAL: 12C27 STAINLESS
STEEL; LENGTH: 4.20" (10.67cm); THICKNESS: .125" (3.18mm);
OPEN: 9.40" (23.88cm); CLOSED: 5.20" (13.21cm);
WEIGHT: 4.10oz (116gm); HANDLE: SKELETONIZED 6AL-4V

NEW! MODEL 42SS (STAINLESS STEEL) BALI-SONG – Blade Style And Dimensions Same As Model 42 With These Exceptions: Weight: 7.80oz (221gm); Handle: Skeletonized Cast Stainless Steel

Available Blade Configurations – ● **MODEL 42SS**
See inside back cover for listing of configurations and pricing.

MODEL 40T & 40TR TRAINERS – Same Size, Weight And Balance As Titanium Model 40 Series; Skeletonized Trainer Safe Blade

Available Blade Configurations – ● **MODEL 40T** ● **MODEL 40TR**
See inside back cover for listing of configurations and pricing.

42, 40TR BALI-SONG®

The roots run deep and the pride burns strong. Bali-Song and the butterfly are as much a part of Benchmade as the name itself. As an art form, steel blades move freely through a rhythmic motion of human manipulation. As a cutting tool, it's the convenience of a folder with the dynamics of a fixed blade. Either way, unless it has the signature butterfly on the blade— it isn't a real Bali-Song.

MODEL 42 BALI-SONG – Blade Material: 440C Stainless Steel Hardened to 58-60HRC; Length: 4.20" (10.67cm); Thickness: 0.125" (3.18mm); Overall: 9.40" (23.88cm); Closed: 5.20" (13.21cm); Weight: 4.10oz (116gm); Handle: Skeletonized Cast 6AL-4V Titanium; Handle Thickness: 0.51" (1.30cm); Lock: Integrated Spring Latch; Blade Style: Weehawk; Sheath: Soft; Belt Carry

Available Blade Configurations
42 • 42S

MODEL 40TR TRAINER – Same Size, Weight And Balance As Titanium Model 40 Series; Skeletonized Trainer Safe Blade

Available Blade Configuration
40T • 40TR

3.3) Gravitator - Snody design

...

425
GRAVITATOR™
SNODY

NEW! You can feel its pull from across the room. No fantasies here though, the 425 is the real deal. Hands oblige to the sculpted shape of a titanium frame and its solid blade mechanics, which are flawlessly shrouded with machined, multi-G10 scales. Added detailing with steel barrel spacers helps to shape the future. A distinctive blade shape is all about edge—tip to tang. Go ahead, pick it up and experience the G-forces for yourself.

MODEL 425 GRAVITATOR - Designer: Mike Snody; Blade Material: 154CM Stainless Steel Hardened to 58-60HRC; Length: 3.50" (8.90cm); Thickness: 0.145" (3.68mm); Open: 8.28" (21.05cm); Closed: 4.77" (12.12cm); Weight: 4.50oz (127.57gm); Handle: Black G10 Scales with Silver G10 Bolsters, Double Thick Titanium Liners, Removable Steel Carry-Clip; Handle Thickness: 0.587" (14.91mm); Lock Mechanism: Modified Locking-Liner; Blade Style & Opener: Modified Whamcliff, Ambidextrous Thumb Stud

3.6) Axis Lock (***)

MC HENRY & WILLIAMS

MODELS 710 & 705 It's the stuff legends are made of—the knife that started the *AXIS revolution!*

- A design so pure that it does very well over a wide spectrum of uses. ● G10 handle skins provide slip-resistant surface grip and will stand up to years of service. ● A modern clip-point blade interpretation puts the slice back into the utility blade, and its reverse curve edge is an ideal addition for efficiency. And if you really want to take it up a notch, the M2 version offers the ultimate edge hold. ● Size is definitely a personal thing, so pick your pleasure. 

MODEL 710 AXIS LOCK FOLDER—Designers: McHenry & Williams; Blade Material: 154CM Stainless Steel Hardened to 58-60 HRC or M2 High-Speed Steel Hardened to 60-62 HRC; Length: 3.90" (9.90cm); Thickness: .115" (2.92mm); Open: 8.80" (22.34cm); Closed: 4.90" (12.44cm); Weight: 4.50oz (128gm); Handle: Black G10 Scales, Double 410 Stainless Steel Liners; Movable Steel Carry-Clip; Handle Thickness: 0.48" (1.22cm); Lock Mechanism: AXIS Lock; Blade Style & Opener: Modified Clip-Point, Dual Thumb-Stud

3.7) Mel Pardue Axis Lock (***)

PARDUE

MODELS 720 SERIES An accomplishment in mid-size design and overbuilt toughness. • Blades come in Bowie or Tanto, both heavy on tip strength and long on edge retention. • Opt for either aluminum or G10 exteriors to harness the AXIS blade mechanics. • The short stature clips low in the pocket, and its rounded form goes almost unnoticed. 

MODEL 720 AXIS LOCK — Designer: Pardue;
Blade Material: 1540M Stainless Steel Hardened to 58-60HRC;
Length: 3.25" (8.26cm); Thickness: .115" (2.92mm); Open: 7.62" (19.35cm); Closed: 4.37" (11.10cm); Weight: 4.30oz (122gm);
Handle: Black Anodized 6061-T6 Aluminum Scales, Double 410 Stainless Steel Liners, Movable Steel Carry-Clip;
Handle Thickness: 0.47" (1.20cm); Lock Mechanism: AXIS Lock;
Blade Style & Opener: Bowie, Ambidextrous Dual Thumb-Stud

Available Blade Configurations:  **MODEL 720**  **MODEL 720S**
 **MODEL 720SBT**  **MODEL 720SBTR**
See inside back cover for listing of configurations and pricing.

MODELS 721 & 722 AXIS LOCK — Designer: Pardue; Blade Material: 1540M Stainless Steel Hardened to 58-60HRC;
Length: 3.25" (8.26cm); Thickness: .115" (2.92mm); Open: 7.62" (19.35cm); Closed: 4.37" (11.10cm); Weight: 3.82oz (108gm);
Handle: Black G10 Scales, Double 410 Stainless Steel Liners, Movable Steel Carry-Clip; Handle Thickness: 0.49" (1.25cm);
Lock Mechanism: AXIS Lock; Blade Style & Opener: Bowie or Tanto, Ambidextrous Dual Thumb-Stud

3.8) Pinnacle Mono-Lock Liner (***)

MODEL 750 PINNACLE FOLDER

Now here's a knife with muscle. The Model 750 Pinnacle™ is for those individuals who like their tools simple and built extra tough for real world performance. ● The locking mechanism is the Mono-Lock™ which is precision integrated right into one of the tumbled, 6AL-4V Titanium handle scales. We tumble the handles to take the edge off, making them much more user friendly. And our clean, brilliantly executed, linear machined Mono-Lock system provides more strength and better function than many of the ongoing designs coming out of the custom knife industry today. ● A strong, unique blade shape offers great utility over a broad range of applications and its reverse curve grind improves cutting efficiencies. The thumb-stud opener is interchangeable to either blade side for right or left, single-handed function. ● The removable steel carry-clip is torx-head screwed into stainless steel inserts as are all assembly screws for lasting hold. ● With features like these, it's easy to imagine the Model 750 Pinnacle's potential for peak performance. Better yet, pick one up if you think you can handle it.

MODEL 750 PINNACLE— BLADE MATERIAL: **ATS-34 STAINLESS STEEL HARDENED TO 59-61HRC**; LENGTH: **3.60" (9.15cm)**; THICKNESS: **.115" (2.92mm)**; OPEN: **8.35" (21.21cm)**; CLOSED: **4.75" (12.07cm)**; WEIGHT: **6.40oz (125gm)**; HANDLE: **MACHINED 6AL-4V TITANIUM LINERS**; LOCK MECHANISM: **MONO-LOCK**

AVAILABLE BLADE CONFIGURATIONS —

Model 750, Model 750S, Model 750BT, Model 750SBT. See back cover for detailed listing of configurations, pricing and material specifications.

3.9) AFCK - Chris Caracci design (***)

...

BENCHMADE AFCK & MINI AFCK

The AFCK (Advanced Folding Combat Knife) was designed in conjunction with a former SEAL operator. The efficiencies in design and superior materials bode well for an excellent outdoorsman knife. All models feature utility ground blades of ATS-34 steel heat-treated to 59-61 HRC which means, "it holds an edge!". Blades come in plain, ComboEdge, or full-serration; in satin finish or with our exclusive BT2 coating for durable corrosion protection. The AFCK and the Mini feature bead blasted G-10 scale handles for positive grip in all weather conditions. Ambidextrous opening holes (licensed by Spyderco®), and some models offer a true left handed configuration. All knives come with a black, stainless steel pocket-clip for ease of carry and versatility.

You get the benefit of all the custom knife features, materials and quality at a price nobody can match.

MODEL 800

Blade	
Length	3.90"
Thickness	0.125"
Material	ATS-34 stainless steel

Model 812SBT LH	BT2 coated with ComboEdge, left handed

3.10) Ascent, Clip Point (*)

BENCHMADE ASCENT™ SERIES

The first knife in the series was the Model 830 with a 3.5" blade. The newest additions to the family are the Model 820, with a 2.9" blade and the model 840 with a 3.9" blade. All models feature utility ground blades of ATS-34 steel heat-treated to 59-61 HRC. All models are available in plain or ComboEdge in satin finish or with our exclusive BT2 coating.

The Ascent models have a number of features that set them apart from other lightweight knives. Some of those features include Zytel® handles and black, stainless steel pocket-clips which may be moved from the pivot end to the butt end on the Model 830 and 840. Ambidextrous opening holes (licensed by Spyderco®), and stainless steel inserts for pocket-clip screws. The pivot screws are also stainless steel and are approximately twice the size as most other lightweight knives.

MODEL 820

Blade	
Length	2.90"
Thickness	0.100"

Model 830SBT	BT2 coated with ComboEdge

3.11) Stryker - Elishewitz design (***)

BENCHMADE

A HONED DESIGN AND COMPETENT CONSTRUCTION ENSURE THE REALITY OF HARD USE RATHER THAN THE PERCEPTION

**MODEL 910SBT
STRYKER**

**MODEL 905
MINI-STRYKER**

MODELS 910 STRYKER® & 905 MINI-STRYKER

An angular approach leads to blade geometry of monolithic proportion. Perhaps a misunderstanding overachiever in efficiencies of cutting.

- The abundance of blade strength is anchored in titanium liners with an exterior armor of G10 for a virtually indestructible gripping surface.
- Solid lock-up is a derivative of the patented modified locking-liner and its distinctive "click" to lock position.

Ponder two Stryker sizes, both are prodigies of cutting performance in the knife world.

MODEL 910 STRYKER – Blade Material: 154CM Stainless Steel Hardened to 68-60-HRC or M2 High Speed Steel Hardened to 60-62-HRC; Length: 3.70" (9.40cm); Thickness: .125" (2.46mm); Open: 8.25" (20.96cm); Closed: 4.68" (11.89cm); Weight: 3.80oz (108gm); Handle: Black G10 Scales; Double Titanium Liners; Removable Steel Carry-Clip; Handle Thickness: 0.48" (1.20cm); Lock Mechanism: Modified Locking-Liner; Blade Style & Opener: Modified Tanto; Ambidextrous Thumb-Disk

Available Blade Configurations –

- **MODEL 910** ● **MODEL 910S** ● **MODEL 910SBT**
- **MODEL 910HS** ● **MODEL 910HSSR** ● **MODEL 910T**

See inside back cover for listing of configurations and pricing

MODEL 905 MINI-STRYKER – Blade Material: 154CM Stainless Steel Hardened to 68-60-HRC; Length: 2.90" (7.37cm); Thickness: .100" (2.54mm); Open: 7.10" (18.03cm); Closed: 4.10" (10.41cm); Weight: 2.70oz (77gm); Handle: Black G10 Scales; Double Titanium Liners; Removable Steel Carry-Clip; Handle Thickness: 0.44" (1.11cm); Lock Mechanism: Modified Locking-Liner; Blade Style & Opener: Modified Tanto; Ambidextrous Thumb-Disk

Available Blade Configurations –

- **MODEL 905** ● **MODEL 905S**
- **MODEL 905SBT**

See inside back cover for listing of configurations and pricing

MODEL 910T

AVAILABLE WITH
TRAINER SAFE
BLADE

BENCHMADE STRYKER™ & MINI STRYKER

Designed by Allen Elishewitz, the Stryker features a 3.7" ATS-34 drop point Tanto blade. The double, titanium liners are housed in G-10 scales and a black pocket-clip is featured on the reverse side of the knife. This knife, with its conventional double bevel, is designed for people who like the features of the Tanto blade shape, but do not want a chisel ground blade. The blade is offered in plain or ComboEdge with either satin finish or our BT2 coating. An ambidextrous opening disk provides quick, easy, one-handed functioning.

The new Model 905 Mini Stryker is a smaller version of the 910. The blade is 2.9" which makes this the smallest model with the Tanto style blade that we have ever offered. You get all the same full-size features and performance in a smaller package.

MODEL 905

Blade	
Length	2.90"
Thickness	0.100"
Material	ATS-34 stainless steel
Hardness	58-61 HRC

[Back to Home](#)

3.12) Mel Pardue II, Auto

MODEL 3550

Low-profile, solid stand-up performance and ready to spring into action at the push of a button—the **Model 3550 Auto** fits the description. This efficient design with spear-point blade and slimmed down lines works well as a comfortable boot knife or for convenient concealed carry with the use of the steel carry-clip. The machined aircraft aluminum handle is symmetrical in shape and fits the hand naturally throughout a variety of grip styles. A convex contour in the handle shape along with grip-grooves make it easy to maintain a strong hold even when wet. This could prove very beneficial under certain conditions, especially when speed and time-function are critical. The Model 3550 has the feel and engineered sports car with the style and poise of a mission-ready alert. *It's a go!*

MODEL 3550— BLADE MATERIAL: 154CM STAINLESS STEEL (59-61HRC); LENGTH: 2.90" (7.37cm); THICKNESS: .090" (2.29mm); OPEN: 7.10" (18.03cm); CLOSED: 4.20" (10.67cm); HANDLE: 6061 T6 ALUM./HARD COAT ANODIZED; LOCK MECHANISM: BUTTON AUTOMATIC WITH INTEGRATED SAFETY; WEIGHT: 2.90 oz. (80gm)

AVAILABLE BLADE CONFIGURATIONS —
Model 3550, Model 3550S,
Model 3550BT, Model 3550S8T.
See back cover for listing
of configurations and pricing.

Model 3550S

Ultra-thin knife body design carries well as a boot knife.

Model 3550S8T

The spearpoint blade shape of this small auto offers enhanced tip qualities.

- Push-button automatic with integrated safety
- 15.4CM stainless steel spear-point blade (58-61HRC)
- Black anodized, machined 6061 T-6 aluminum handle with tip-down pocket clip
