

Our blades are the finest ever to be in a knife of this type. They are ground by a master of this difficult art form. Jody Samson, Bali-Song custom cutter and blade designer, has set the standards which others can only hope to duplicate. He has many years of experience beginning with his early association with the pioneer knife maker, John Nelson Cooper. Jody's work also includes the Conan Sword, wielded by Arnold Schwarzenegger as "Conan," a John Milus' film, a Dino DeLaurentis production.

Each knife features one non-interchangeable blade of your choice (1-4).

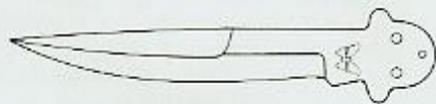

1. Utility — General purpose blade

2. Drop Point — Skinning and Field Dressing

3. Bowie — Our version of the famous American fighting blade.

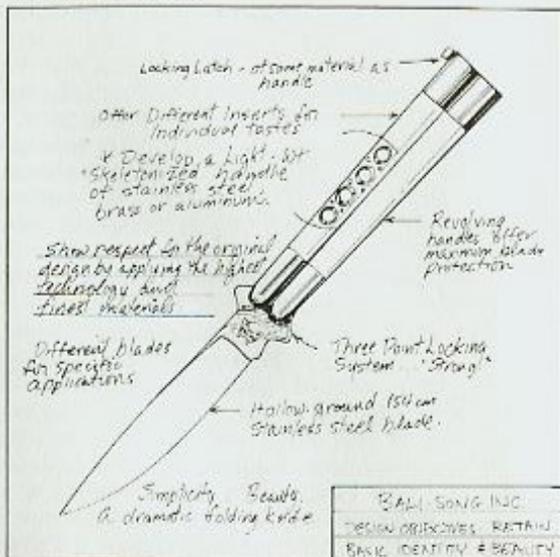

4. Wee Hawk — The ultimate in Survival - Urban Defense

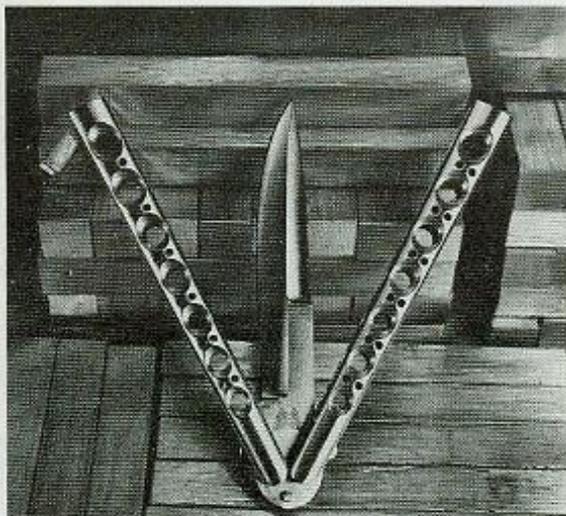

Les de Asis, President of Bali-Song Inc. continues to meet the challenge of building the best knife available for the world's discriminating buyers.

The Challenge

The Accomplishment

Overall Length — 9 inches open, 5 1/2 inches closed
Blade — 3 1/2 inch cutting edge.

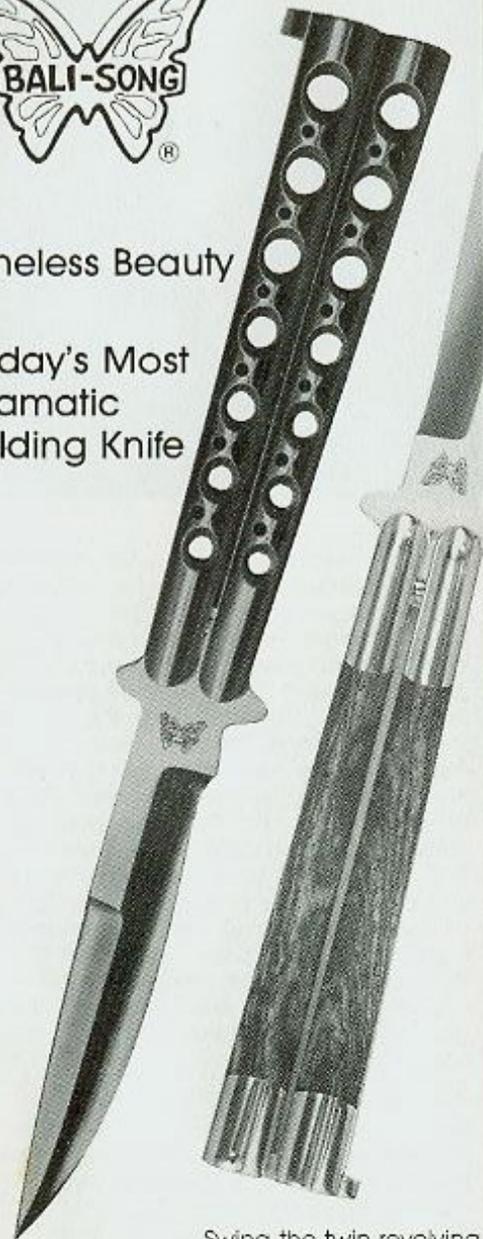

"One of the best and most dramatic knives I have ever owned. I have given martial arts demonstrations with all sorts of knives, but the Bali-Song opening techniques add a whole new dimension to the usual twirls, toints, and spins." David E. Steele, weapons expert and staff writer for Soldier of Fortune, Guns, Knife World and Combat Illustrated.

Timeless Beauty

Today's Most
Dramatic
Folding Knife

Swing the twin revolving handles away from the hollow-ground blade and experience machined precision as they lock into a strong, uncompromising unit. The functional beauty of this classic design allows us to realize the most from today's technology.

THE STANDARD OF STRENGTH AND BEAUTY

No maker of fine knives is more aware of the varied and demanding requirements placed on their products than we at Pacific Cutlery Corporation. From the discriminating collector who places a premium on fine workmanship; to the sportsman who's primary concerns are function and dependability; to the martial arts enthusiast who appreciates the physical blend of design, balance, and response in the never ending quest for perfection of form.

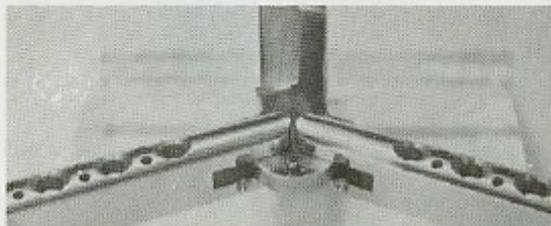

We are the only licensed manufacturer of the patented **BALI-SONG** knife. We continue the Bali-Song tradition of combining both high technology and old-world craftsmanship to produce the most intriguing knives in the world.

OUR PRESENTATION SERIES

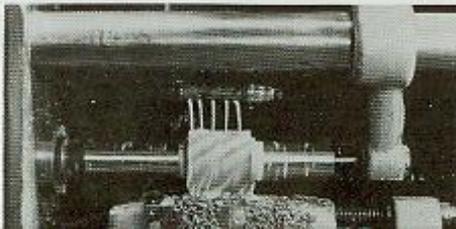

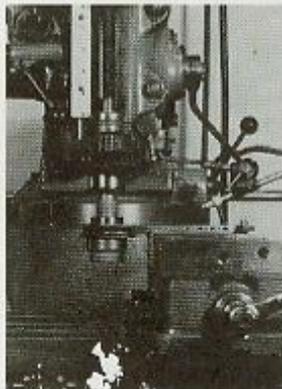

Our Presentation **BALI-SONG** knife is custom hand-made sparing no expense, and offering no compromise in its development and production. We precision machine solid brass or stainless steel handles, and painstakingly hand fit the beautiful inlay of your choice. We also offer a skeletonized handle of stainless steel or brass, for the ultimate in total function. We use 440C stainless steel in our blades. In order to utilize the exceptional edge-holding capability of this steel, we use heat treating methods developed and used by the aerospace industry. Our blades are heat treated in a vacuum furnace to minimize contamination, then sub-zero quenched resulting in a blade tough enough to hold an edge without being brittle.

PRESENTATION SERIES FEATURES INCLUDE:

- Completely hand-ground satin-finish 440C stainless steel blade, 3/16" thick, heat treated to a Rockwell hardness of 59-61 on the C scale.
- Electro-chemical etched logo.
- Patented integral handles machined from solid stock to exacting specifications provide the maximum in strength, blade protection and easy cleaning.
- Insert materials: Micarta®, a high pressure phenolic resin laminate, which will not crack, chip, fade or shrink. Exotic woods, and other natural materials available upon request.

- Our three-point locking system incorporates two fully machined stainless steel pivot pins and tang pin, resulting in the strongest folding knife available today.

Our blades are the finest ever to be in a knife of this type because they are ground by a master of this difficult art form. Jody Samson, Pacific Cutlery Corporation's custom cutler and designer, has set the standard which others can only hope to duplicate. He has many years experience beginning with his early association with the pioneer knifemaker, John Nelson Cooper. Jody's work also includes the priceless Master's sword wielded by Arnold Schwarzenegger as "Conan"; a

John Millus film, a Dino DeLaurentiis production.
