Actual Size

**The pocket knife for
easy access and smooth
handling.**

A simple solution to some old
pocket knife problems. THE
CLIPIT, designed to be used,
EASILY USED . . . to readily perform
efficiently with one hand.

U.S. and Foreign Patents Pending

THE CLIPIT™

The CLIPIT's practicality.

Cover pictures A, B, C, D, described below

A. We put a pocket clip on the handle of the knife, replacing the need of a sheath. This allows easier accessibility (like the intent of a sheath knife) with the convenience of a folding knife. The CLIPIT wears comfortably at

the edge of your pocket, boot, purse or even a bathing suit. In an instant, it's in your hand . . . no digging into pockets, no snaps to unsnap, no bulky sheath hanging off your hip . . . the CLIPIT is easily carried even wearing a THREE PIECE SUIT.

B. The CLIPIT's design is the simplest, least obstructive opening method of any knife on the market today. We've put a hole in the blade large enough to slip the tip of your thumb into for opening the knife with one hand. The 2-7/8" blade locks open with a unique front lock, also permitting one hand closing. (Front Lock design by Al Mar)

C. We've sharpened a small portion of the false edge. This permits simple cuts on string, tape, fishing line, etc. without completely opening the blade. Control of the blade is easily maintained by grasping the "Opening Hole" with thumb and forefinger.

D. In an emergency, it is possible to grasp the "Opening Hole" while the CLIPIT is folded in one's pocket . . . remove the knife from the pocket (or purse) and open it in one motion with a quick snap of the wrist. This takes very little practice to become proficient.

Specifications and Construction

Blade — Modified Clip Point with "Opening Hole" built into top of blade.

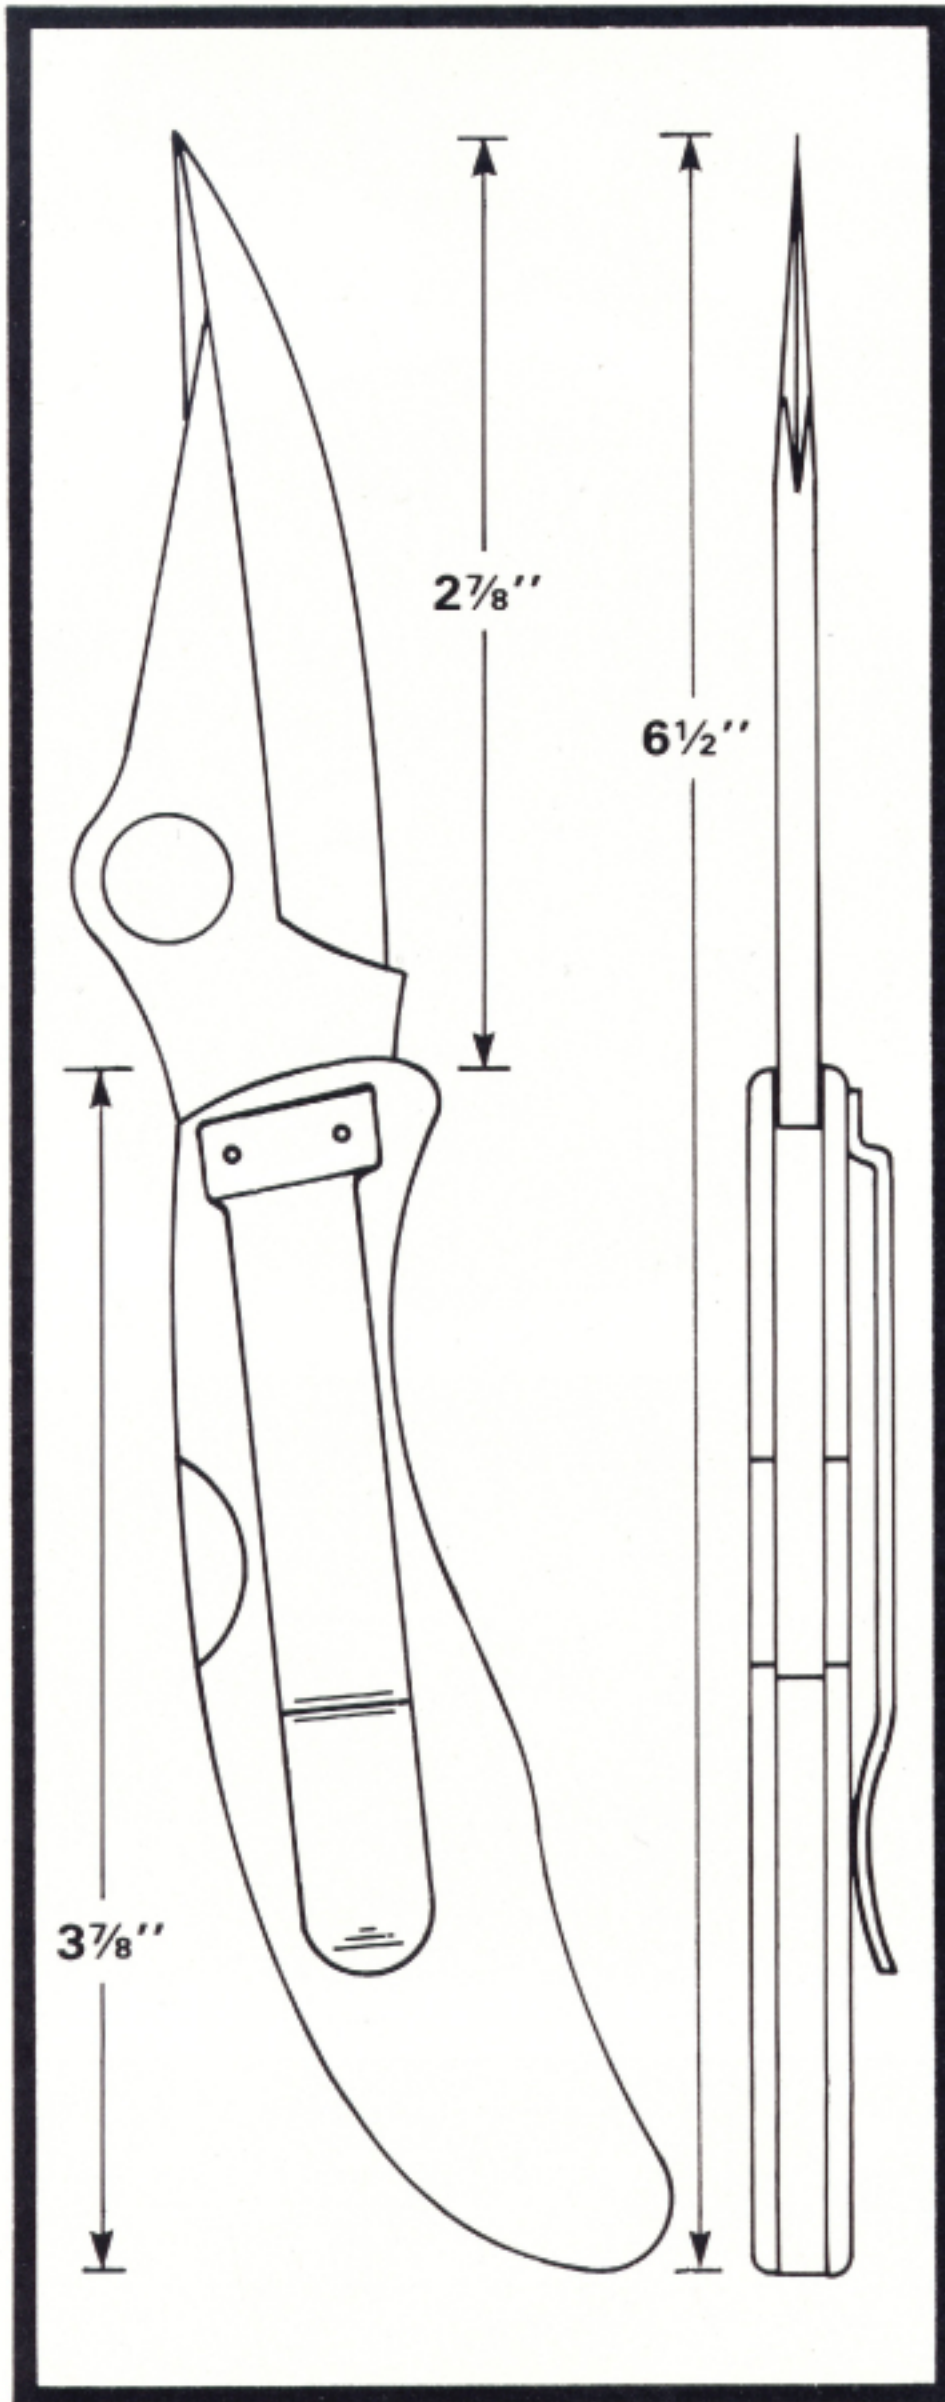

Stainless. Blade Length 2-7/8" (73mm)

Blade Thickness .120 (3mm)

Handle — All stainless construction. Ideal for boating, hunting, fishing, etc. Blade is locked into "open" position via a Front Lock.

Clip — Stainless construction, tempered for rigidity. Available in both right handed and left handed models (please specify when ordering).

Overall length — Opened 6-1/2" (165mm) closed 3-7/8" (99mm)
