Zero Tolerance Knives

POLICE

Model **0100**

The 0100 is a military-style, fixed-blade knife featuring an innovative recurve blade shape. ZT designed the 0100 blade for multi-tasking, minimal mass, and maximum performance. It provides ideal leverage for cutting the toughest materials and a perfectly centered point for precision piercing.

The CPM 3V tool-steel blade is Tungsten DLC-coated in matte black. The scales are 3-D machined G-10, also in matte black. The machining provides a secure grip, while the G-10 was selected because it exhibits extremely high mechanical strength — even in extreme temperatures. G-10 is also an excellent insulator.

CPM 3V tool steel is designed to provide maximum resistance to breakage and chipping and is a highly wear-resistant steel. CPM 3V offers impact toughness greater than A2, D2, Cru-Wear or CPM M4, approaching the levels of S7 and other shock resistant grades, while providing excellent wear resistance, high hardness and thermal stability for coatings. With a Rockwell rating of 58-60, CPM 3V is the tool steel for tools that have to perform under the harshest of field conditions.

The 0100 comes with a nylon-webbing sheath with multi-carry configuration capability and a convenient utility pocket.

With its bold looks, premium-quality materials, and precision function, the 0100 offers knife users who depend on their blades in life-and-death situations everything they demand.

Military

MODEL 0100-FIXED BLADE

Blade.....CPM3V tool steel with Tungsten DLC coating
5-3/4 inches (14.6 cm), .190 inches thick
Scales.....3-D machined, G-10 in matte black
Overall.....10-1/2 inches (26.7 cm)
Weight.....11.2 oz. (19.6 oz. with sheath)

**Made in the
UNITED STATES of AMERICA**

A portion of the proceeds from every sale of this high-quality, duty-ready knife will be donated to the PVA Heritage Fund, which works on behalf of the veterans who have given so much in service to their country.

Includes nylon sheath with MOLLE compatible, multi-carry configuration webbing and universal pouch.

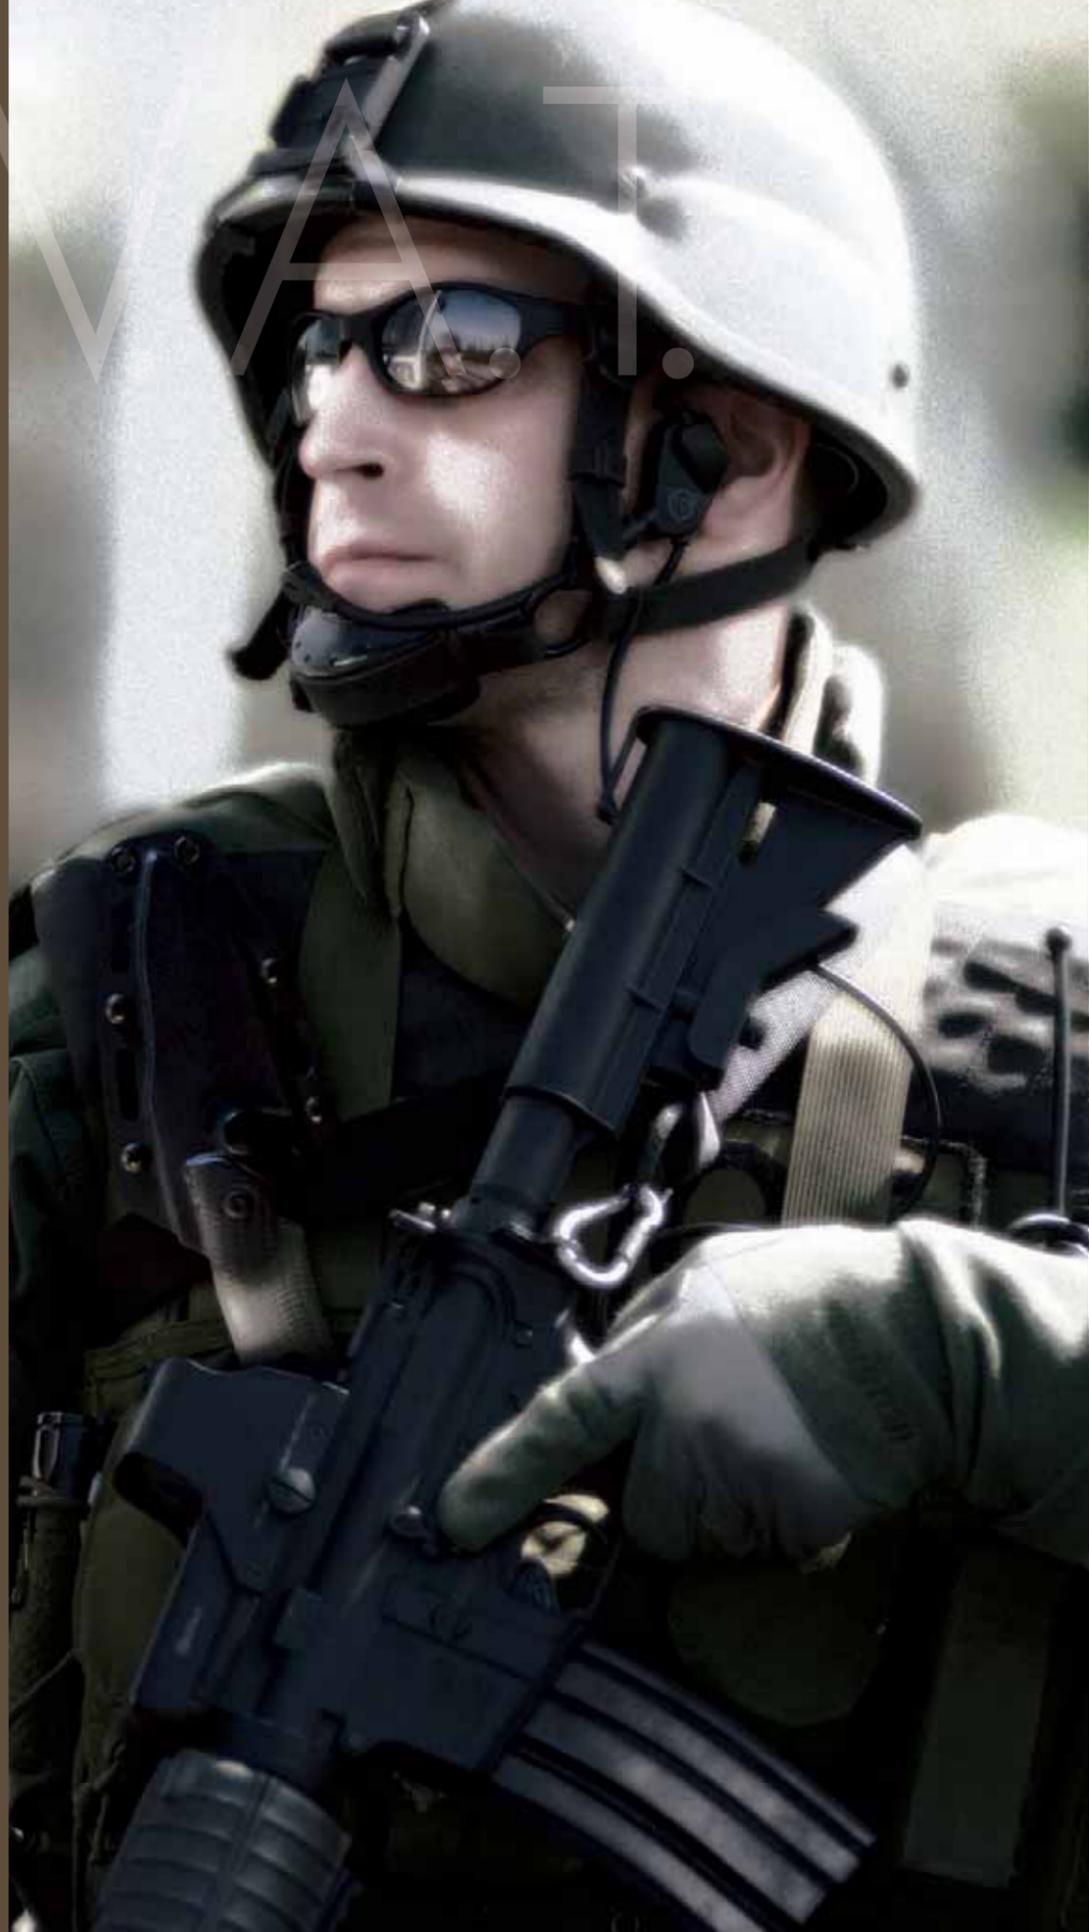

Model 0121

The 0121 is a no nonsense fixed-blade workhorse with multifunction capabilities. Designed by the military knife experts at Strider, the blade is S30V stainless steel for exceptional strength, wear resistance, and the ability to take on just about any task. The full-tang blade is sturdy enough even for prying and punching tasks. The Tungsten DLC coating makes the blade non-reflective and adds to the corrosion resistance.

The choil offers a built-in cord cutter ideal for ripping through everything from 550 cord to wire insulation. The handle features Ranger Green scales in 3-D machined G-10 for a solid grip in any environment. The aggressive arc at the front of the handle and notched thumb ramp provide an even more secure grip.

The 0121 comes with a multifunction, MOLLE compatible sheath in durable Kydex®. The sheath has a dual retention lock for a quick, smooth draw when it's needed. There's also a removable and adjustable belt clip.

& Rescue

MODEL 0121-FIXED BLADE

Includes Kydex® sheath with MOLLE compatible, multi-carry configuration.

Blade.....S30V stainless steel with Tungsten DLC coating
4-1/4 inches (10.8 cm), .190 inches thick
Scales.....3-D machined, G-10 in Ranger green
Overall.....8.0 inches (20.3 cm)
Weight.....9.0 oz. (12.4 oz. with sheath)
Includes cord cutter located on the choil of the blade

**Made in the
UNITED STATES of AMERICA**

A portion of the proceeds from every sale of this high-quality, duty-ready knife will be donated to the PVA Heritage Fund, which works on behalf of the veterans who have given so much in service to their country.

Model 0150

The 0150 is built of top-of-the-line materials for unparalleled performance. The blade is S30V stainless steel, which provides exceptional strength and wear resistance. One of the industry's strongest steels, S30V can stand up to even rough or abusive tasks. For additional strength, the blade is coated in non-reflective bronze PVD (Physical Vapor Deposition).

The full-tang blade is secured with sturdy G-10 scales, 3-D machined with finger notches and contoured for a superior grip in a full range of environmental conditions — hot, cold, wet, or dry and dusty. The slim design makes it easy to conceal when desired, yet offers plenty of power when required.

The 0150 comes with a Kydex® sheath that provides multiple carry options. Wear the knife in your boot, strap it at the small of your back, or attach it to a MOLLE. There's an optional secondary retention strap for use in situations where the knife must remain immobile.

MODEL 0150

BOOT KNIFE

Blade.....S30V stainless steel with PVD coating
3-1/2 inches (8.9 cm)
Scales.....3-D machined, G-10 in matte black
Overall.....7-1/2 inches (19.3 cm)
Weight.....3.6 oz. (5.0 oz. with sheath)

**Made in the
UNITED STATES of AMERICA**

Includes Kydex® sheath with MOLLE compatible, multi-carry configuration.

Reliability

Model **0200**

ZT created a professional-grade folding combat knife built to survive harsh, real-world conditions.

The 0200 features an innovative recurve blade shape designed for multi-tasking capability with minimal mass and maximum performance. Precisely balanced, the recurve blade provides ideal cutting leverage and precision piercing.

The knife features a 154CM stainless-steel blade with black Tungsten DLC coating for extra durability. The 0200's matte black scales are 3-D machined G-10 to provide a secure grip. G-10 is high performance insulator and exhibits extremely high mechanical strength and dimensional stability in a wide variety of extreme conditions.

The 0200 includes a pivot-shaft adjustment feature that enables tighter or looser blade deployment. It also offers an ambidextrous thumb stud for one-handed opening. For tip-up or tip-down carry the 0200 also includes a four position reversible or removable clip.

MODEL 0200 MANUAL FOLDER

Blade.....154CM stainless steel with Tungsten DLC coating
4.0 inches (10.1 cm), .156 inches thick
Scales.....3-D machined, G-10 in matte black
5-1/4 inches (13.3 cm)
Lock.....Locking liner
Weight.....7.8 oz.

Made in the
UNITED STATES of AMERICA

Includes a quad mounting system for tip-up, tip-down, left or right handed clip carry.

PVA OUTDOOR RECREATION
PARALYZED VETERANS OF AMERICA HERITAGE FUND EST. 2001

A portion of the proceeds from every sale of this high-quality, duty-ready knife will be donated to the PVA Heritage Fund, which works on behalf of the veterans who have given so much in service to their country.

Extreme

Model **0200st**

The 0200st is the serrated version of the 0200. Like its smooth counterpart, it is a professional-grade folding combat knife built to survive the harshest conditions. Yet it also provides the additional utility of a partially serrated blade.

The 0200st's recurve blade shape ensures a knife with minimum mass and maximum multi-tasking capabilities. The precisely balanced blade provides ideal cutting leverage and the strength needed for precision piercing.

The blade is 154CM stainless steel with black Tungsten DLC coating for additional toughness. The 0200st's matte black scales are 3-D machined G-10 for a secure grip. The G-10 offers high performance insulation and high mechanical strength.

Like the 0200, the 0200st includes a pivot-shaft adjustment feature that enables tighter or looser blade deployment. It also offers an ambidextrous thumb stud for one-handed opening. A reversible or removable clip is included for tip-up or tip-down carry.

Includes a quad mounting system for tip-up, tip-down, left or right handed clip carry.

Model 0300

ZT introduces the new, all-black ZT 0300 and 0300ST. These aggressive combat knives features our quad mounting system for versatile carry options, and are equipped with the patented SpeedSafe® assisted opening system.

With SpeedSafe®, the blade can be deployed one-handed with an ambidextrous thumb stud or index finger protrusion. The 0300s are always ready to go to work — as quickly as they needs to be.

Built like our users' lives depended on it — because we know they can — the ZT 0300s feature a S30V stainless-steel blade with matte black Tungsten DLC coating. The S30V provides extreme durability as well as wear and corrosion resistance. The DLC (Diamond Like Carbon) coating enhances hardness and reduces friction drag.

For extreme mechanical strength and a secure grip, this high performance blade is paired with 3-D machined scales of super-strong, black G-10 and titanium. A titanium frame lock keeps the blade secure. Field adjustments can be made quickly and easily using the hex head pivot shaft nut.

The 0300s quad mounting system lets the user mount the clip in four ways: tip-up, tip-down, on the left side, or the right. Any way it's mounted, the blade stays secure until needed.

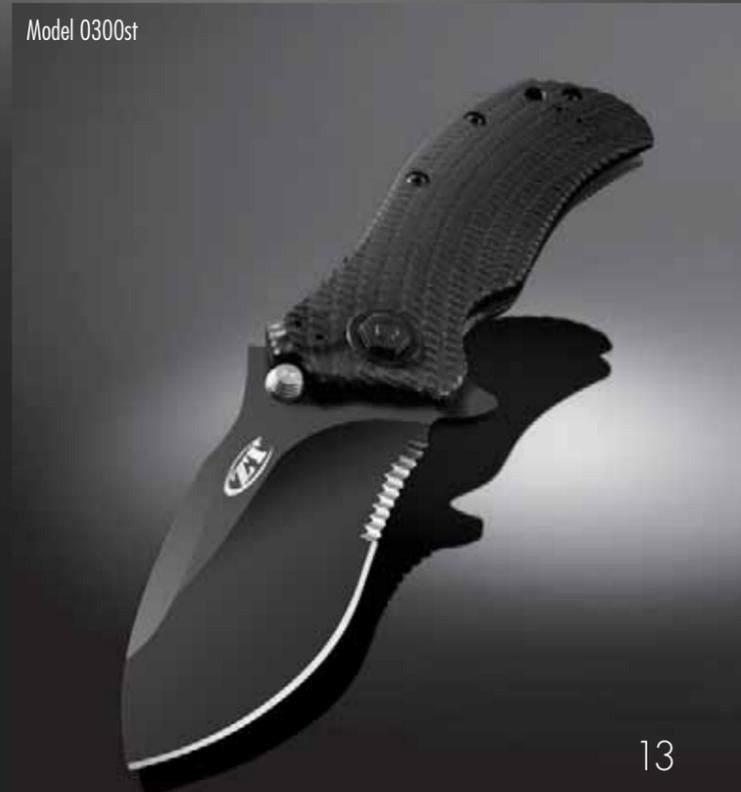

Model 0300st

Tested

MODEL 0300, 0300ST-SPEEDSAFE® FOLDER

Model 0300st

Blade.....S30V stainless-steel with Tungsten DLC coating

5-1/4 inches (13.3 cm)
Lock.....Titanium frame lock
Weight.....8.0 oz.
Includes SpeedSafe® Ambidextrous Opening System
and a quad mounting clip system for tip-up, tip-down,
left or right handed clip carry.

Made in the UNITED STATES of AMERICA

Model 0301

ZT is proud to offer the model 0301, designed by Ken Onion and Strider — a top-quality combat knife equipped with the patented SpeedSafe® assisted opening system.

SpeedSafe® enables users to deploy the blade one-handed — using their choice of an ambidextrous thumb stud or an equally ambidextrous index finger protrusion.

In addition to SpeedSafe, the 0301 features a tough S30V stainless-steel blade with ZT's unique "Tiger Stripe" Tungsten DLC coating. The S30V blade steel is designed to provide the perfect combination of durability, wear resistance, and corrosion resistance. The Tungsten DLC tiger striping also provides a non-reflective camouflaged surface.

The 0301's Ranger Green scales are made of 3-D machined G-10 and titanium for incredible mechanical strength and a super-secure grip. The 0301 also features a 3/8-inch hex head pivot shaft nut that makes field adjustments fast and easy with minimal tools.

In addition, this dynamic folding knife comes with a reversible or removable clip for tip-up or tip-down carry — so it remains securely stowed until the user needs it.

MODEL 0301-SPEEDSAFE® FOLDER

A portion of the proceeds from every sale of this high-quality, duty-ready knife will be donated to the PVA Heritage Fund, which works on behalf of the veterans who have given so much in service to their country.

OUTDOOR RECREATION

Made in the UNITED STATES of AMERICA

Model 0302

ZT's model 0302 has all the features and advantages of our 0301, but with Coyote Brown G-10 scales.

Like the 0301, it's a top-quality folding combat knife that comes equipped with the patented SpeedSafe® assisted opening system. Use the ambidextrous thumb stud or index finger protrusion to easily deploy the blade — even if you've only got one hand free.

In addition to SpeedSafe®, the 0302 has a tough S30V stainless-steel blade and "Tiger Stripe" Tungsten DLC coating. The S30V blade steel provides toughness, wear resistance, and corrosion resistance. The Tungsten DLC tiger striping also provides a non-reflective camouflaged surface.

The 0302's Coyote Brown scales are constructed of a combination of 3-D machined G-10 and titanium. This pairing provides top performance in the form of high mechanical strength and a non-slip grip.

The 0302 also features a 3/8-inch hex head pivot shaft nut for fast-and-easy field adjustments with minimal tools. There's also a reversible or removable clip for convenient and secure tip-up or tip-down carry.

Includes a quad mounting system for tip-up, tip-down, left or right handed clip carry.

MODEL 0302 SPEEDSAFE® FOLDER

5-1/4 inches (13.3 cm)
Lock.....Titanium frame lock
Weight.....8.0 oz.
Includes SpeedSafe® Ambidextrous Opening System

Made in the
UNITED STATES of AMERICA

Model 0350st

ZT's new and more compact 0350 is also available in a model with a partially serrated blade. The new 0350st is ideal for when you want more sawing power in your blade.

Because the sharper tips of the serrations contact the material first, increased pressure is applied to the material at those points, enabling the 0350st's blade to puncture the material easily. A sawing motion quickly produces the cut you need.

The 0350st also features the patented SpeedSafe® assisted opening system so that the blade can be deployed one-handed using the ambidextrous thumb stud or index finger protrusion.

The ZT 0350st is built with a S30V stainless steel blade with non-reflective black Tungsten DLC coating. This steel is exceptionally durable, corrosion and wear resistant. The blade is serrated at the back of the blade, leaving the front with a smooth edge for precision push-cuts.

For a secure grip and top mechanical strength, even in rough field conditions, the high-performance, partially serrated blade is paired with sure-grip G-10 scales. A locking liner secures the blade when in use.

The 0350st also includes ZT's quad mounting system for complete carrying versatility. Mount the clip in any of four ways: tip-up, tip-down, on the left side, or the right.

& Protect

MODEL 0350ST-SPEEDSAFE® FOLDER

Includes a quad mounting system for tip-up, tip-down, left or right handed clip carry.

Tanto

Model **0400**

The 0400 is a high performance, folding tactical knife designed by custom knife maker Ken Onion.

And because you don't always have both hands free, the 0400 features the patented SpeedSafe® torsion bar system for assisted, one-handed opening. Choose the ambidextrous thumb stud or index finger protrusion for extreme deployment ease and flexibility.

While SpeedSafe® ensures ease of use, the modified Tanto blade in S30V stainless-steel provides additional strength. The blade is Tungsten DLC coated in matte black for non-glare corrosion resistance. The machined aircraft aluminum scales in anodized black provide lightweight durability, while the Trac Tec inserts provide a solid grip in almost any condition.

The 0400 is one of the thinner folding knives in the ZT line, which makes it excellent for a compact carry. The back handle does not contain the friction-tape insert, allowing an easier draw and storage in the pocket.

In addition, the 0400 comes with a reversible or removable clip for tip-up or tip-down carry. Like all ZT knives, it is designed for professionals who require the very best from their equipment.

Tactical

MODEL 0400-SPEEDSAFE® FOLDER

Includes a dual mounting system for tip-up or tip-down, right handed clip carry.

- Blade.....S30V stainless steel with Tungsten DLC coating
3-3/4 inches (9.5 cm), .156 inches thick
- Handles.....Black anodized aircraft aluminum with front friction-tape insert
5.0 inches (12.7 cm)
- Lock.....Locking liner
- Weight.....5.0 oz.
- Includes SpeedSafe® Ambidextrous Opening System

**Made in the
UNITED STATES of AMERICA**

Model 0400st

For all the tactical advantages of the 0400, but with the addition of a partially serrated blade, choose the 0400st.

Naturally, it also features the patented SpeedSafe® torsion bar system for assisted opening. Both left-handed and right-handed users can deploy the ambidextrous thumb stud or index finger protrusion with equal ease.

While SpeedSafe® ensures smooth, easy opening, the modified Tanto blade in S30V stainless-steel provides a blade that is both strong and corrosion resistant. For added performance and corrosion resistance, the blade is Tungsten DLC coated in non-glare matte black. The matching matte black scales are built of machined aircraft aluminum for lightweight durability; Trac Tec inserts provide a secure grip under a wide variety of extreme conditions.

The 0400st is one of the thinner folding knives in the ZT line, which makes it excellent for a compact carry. The back handle does not contain the friction-tape insert, allowing an easier draw and storage in the pocket.

For your choice of tip-up or tip-down carry, the 0400st comes with a reversible or removable clip and is designed for reliability no matter the tasks you demand of it.

Includes a dual mounting system for tip-up or tip-down, right handed clip carry.

By

Model 0500

When it comes to folding knives, some knife users think there can be nothing new under the sun. Others just quietly take out their ZT 0500.

What's different? For one thing, designers Grant and Gavin Hawk have given the 0500 an oversized 5/16-inch pivot shaft for strength over and above the call of duty. For another, the pivot and the Hawk Lock are protected by polyurethane seals that keep out mud, sand, fine dust and moisture and ensure a smooth flawless blade deployment each and every time. The polyurethane seals are resistant to petroleum products and withstand a full range of temperatures without deforming or deteriorating. This is a knife that's built to perform under just about any circumstances and in just about any environment.

The blade is built of 154CM stainless steel with non-reflective Tungsten DLC coating. This rugged stainless steel features a very high carbon content for increased hardness, wear resistance and edge retention — durability that is further enhanced by the Tungsten DLC coating. The handle is machined 7075 anodized aluminum with textured G-10 scales for superior grip and durability.

The proven Hawk lock offers a solid and dependable lock up and can be released using your thumb for right hand use or index finger for left-handers. Oversized blade-opening lugs give you total control over blade deployment, even while wearing combat gloves. There's also a reversible pocket clip for left or right-handed carry.

by land

MODEL 0500-MANUAL FOLDER

Includes reversible pocket clip for left or right-hand carry.

Model

0610st

ZT's practically indestructible construction and top-of-the-line materials. Non-reflective matte black finish. Partially serrated tanto-style blade. And automatic operation. It's the new Zero Tolerance 0610st.

Sure, this new ZT Automatic is ready for duty fast—with the push of a button—but safety is a top consideration, too. ZT security technology, like ZT construction, is second to none. The 0610st features the ZT Push Button Auto Lock. It operates with the ease of a push button, but features a secondary slider lock that prevents the button from being accidentally depressed and deployed. Just move the secondary slider forward into a notch under the button and it's completely secure. The secondary slider lock provides added security to the blade while in the open position.

The natural strength of the partially serrated, Tanto blade shape is enhanced by the toughness, corrosion resistance, and superior edge retention of 1.54CM stainless steel. Tungsten DLC coating provides additional corrosive protection and decreases friction. For lighter weight with extreme strength, the 0610st's scales are 6061-T6 anodized aluminum.

Automatics

MODEL 0610ST-PUSHBUTTON

Includes a dual mounting system for tip-up or tip-down, right handed clip carry.

Automatic knives are sold only to authorized dealers of Kai USA Ltd. We must have the dealer's signed Section 18 USC Federal Form on file. The sale of automatic knives is Federally regulated. Always check permissibility within your State or locality as non-Federal personnel may be precluded from ownership or use by State law. All automatic knives shipped by Kai USA Ltd. will be shipped via couriers such as UPS and FedEx; they cannot be shipped through the US Postal Service.

Handle.....3-D machined, 6061-T6 anodized black aircraft aluminum
5-1/4 inches (13.3 cm)
Overall.....8-3/4 inches (22.3 cm)
Lock.....Push button with slider safety
Weight.....5.0 oz.

Made in the UNITED STATES of AMERICA

Model **0650st**

Innovative knifemakers Grant and Gavin Hawk score again with the ZT 0650st Automatic. It features the solid Zero Tolerance feel, a slightly lighter weight, and unique styling.

The 0650st is equipped with ZT's new CrossFire Auto Lock for extreme lockdown security. Toss it on a table, snag it on a seatbelt, manhandle it on a duty belt—there's no chance the blade will accidentally deploy. Why? Because the unique CrossFire lock requires two motions to work. First slide the lock toward the knife's spine, then pull it down toward the butt. Only then will the blade deploy with a satisfying click into position. The CrossFire Auto Lock provides added security to the blade while in the open position.

The Hawks chose a drop-point blade with partial serration in high-end 1.54CM stainless steel for toughness and easy resharpening. Non-reflective, matte black Tungsten DLC coating offers additional performance. For lighter weight, the 0650st's scales are constructed of 6061-T6 anodized aluminum with textured G-10 inlays for a secure grip. The pivot shaft can be adjusted for tighter or looser blade deployment, and the 0650st also includes a reversible or removable clip.

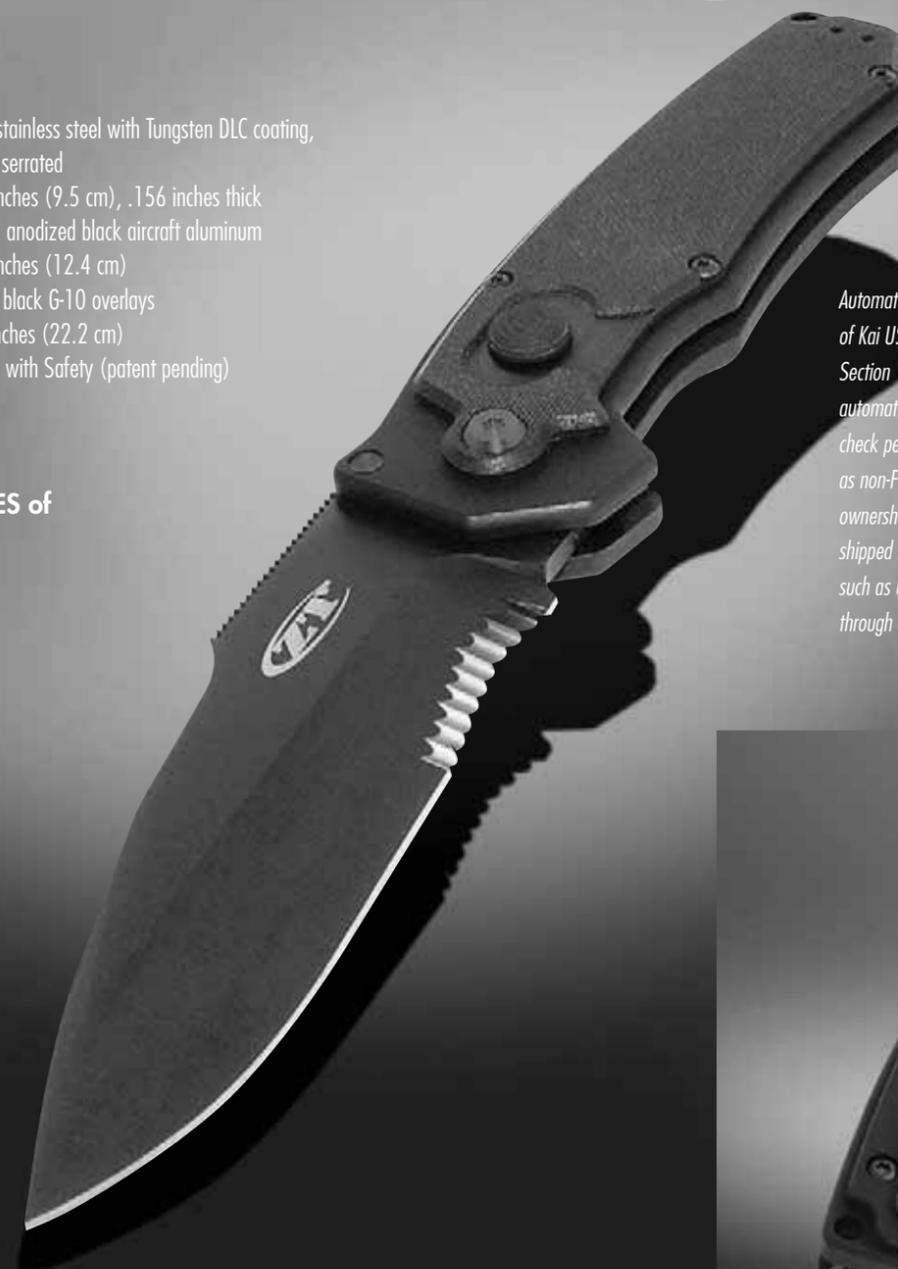

Fire

MODEL 0650ST-AUTOMATIC

Includes reversible pocket clip for left or right-hand carry.

Model **JB2**

In life-and-death situations, your equipment simply has to perform, first time, every time. That's the philosophy behind all ZT knives and tools — and our new JB2 shroud cutter (designed by Strider) is no exception.

The JB2 is constructed of 13C26 stainless steel with a tough, Tungsten DLC coating in matte black. The business end is a 270° cutting notch with a .34 in. entry point. It easily slices through cord, webbing, belts, boot laces, and even clothing, if necessary. The JB2's non-exposed cutting notch ensures cutting only occurs where and when needed.

To further ensure safety, a recess for the user's forefinger and thumb makes for a secure grip even in challenging situations.

The JB2 also features a Carbide glass-breaker tip located at the butt of the handle and two oxygen tank wrenches built into the handle. They're at right angles to each other for easy access on most any tank. In addition, the JB2 offers three box hex wrenches in the center of the handle — choose 3/8, 7/16 and 1/2-inch sizes.

The tool includes a nylon jump-rated sheath with quick-release cinch strap and belt loop. The sheath comes in a MOLLE compatible configuration.

Includes Carbide glass-breaker tip.

Airborne & Rescue

Zero Tolerance Knives

Stock up on ZT gear and help spread the word about the ZT line of Serious Knives for Serious Missions. From secure displays to banners to logo apparel, you'll find the materials you need to support your ZT sales right here.

Choose a single- or double-sided display to show off your ZT products. Each side can easily accommodate up to seven knives. The knives are secured with magnetic and clip systems, and the display locks to protect your investment. A single-knife countertop display is also available, as well as a banner to let your customers know you carry these made-in-the-USA knives.

Be part of Team ZT in our 100% washable cotton logo shirt. It comes in olive green and is available in XL only, because what other size do you need, really? Add the official ZT baseball cap in heavy-duty cotton and you're good to go.

And you can help your customers protect their investment in ZT knives with our selection of sheaths. The ZT pouch has a zippered closure and is lined with sheepskin fleece. The belt sheath, in foliage green or black, works equally well on a belt or on Molle gear. For larger collections of ZTs, choose the knife storage bag, which holds up to 18 knives in padded compartments.

ZT gear is designed to help accomplish your own serious mission of selling the best military knives available.

LIMITED LIFETIME WARRANTY

Zero Tolerance products are guaranteed for the lifetime of the original owner to be free of defects when received from the factory. Any product we find to be defective in its original material, construction or workmanship will be repaired or replaced with the same item or one of equal value at no charge. (Of course, normal wear, abuse such as prying with the knife or neglect are excluded from this non-transferable warranty.) For warranty service, please return product via UPS or insured mail. Include your name, address, telephone number, proof of purchase (sales slip) and a short explanation of the warranty service requested to the address below. Please allow 4-6 weeks for delivery.

ZT products are made in the USA. We reserve the right to change specifications, materials or discontinue products at any time without notice.
